

The screenshot shows an IDE window with a Go code file named 'meter.go'. The code contains two functions: 'NewMeter' and 'NewRegisteredMeter'. A context menu is open over the 'NewRegisteredMeter' function, with the 'Change Signature...' option selected. The code is as follows:

```
31 func NewMeter() Meter {  
32     if !IsMetrics {  
33         return NilMeter()  
34     }  
35     m := newStandardMeter()  
36     arbiter.Lock()  
37     defer arbiter.Unlock()  
38     arbiter.meters[m] = struct{}{}  
39     if !arbiter.started {  
40         arbiter.started = true  
41         go arbiter.tick()  
42     }  
43     return m  
44 }  
45  
46  
47  
48  
49 func NewRegisteredMeter(name string, r Registry) Meter {  
50     c := NewMeter  
51     if nil == r  
52     {  
53         r = Defa  
54     }  
55     r.Register(  
56     return c  
57 }  
58  
59 type MeterSnapsh  
60 count  
61 rate1, rate, 6. Constant...
```
