Oakley has sunglasses for any sport and any lighting conditions. Here we take a look at basic Oakley information to help you zero in on the perfect pair of Oakley Recipe Sunglasses, Oakley Recipe Ski Goggles and Oakley Recipe Glasses. First, when you see XL or XLJ don't think the extra is great. Most Oakley semi-rim frames are available with a rounded lens or squared off the lens. Standard models are equipped with a rounded lens. The XL or XLJ models are squared. XL lenses have only slightly more coverage than a standard lens. But you can put the XL lens in a normal frame and vice versa. On our Oakley page, you'll see that we usually show a model with a conventional lens right under the XL or XLJ lens model. For example, the usual flak jacket right under the Flak Jacket XLJ. These two frames are exactly the same size. Oakley lens Types, Shades, and Iridium Infusions - All available in the recipe. -Tinted lenses - the shade is applied on the outside of the lens. Oakley offers its toned lenses with or without Oakley Iridium coatings. -Polarized lenses - Polarization is a film inside the lens that only allows light to pass directly through the lens. Scattered light, or glare, is blocked by this film. Polarized lenses are preferred by most athletes, and ophthalmologists often prescribe polarized lenses to patients who have had recent eye surgery, have had their eyes enlarged, or generally have light-sensitive eyes. A polarized lens is considered a healthier lens than a standard tinted lens. Some electronic displays may be harder to read with polarized lenses, but tilting your head a bit when this happens has usually solved the problem. -Transitions lenses - These lenses darken in the presence of UV radiation, or sunlight. There are 5 transient colors from Oakley, 3 of which are Iridium transitions. They are triggered by ultraviolet light, so the transition lenses will not darken in the car. -Iridium Lenses - This is an additional layer of contrast that is poured into the lens, just as the polarizing coating is in the lens. This patented Oakley technology often has a mirror effect along with an additional layer of contrast. Iridium lenses are available with almost any lens color, polarized or not. -Prism lenses - These coatings are Oakley's newest innovations. Like the Iridium coating, the contrast level is more finely tuned. For example, Prism lenses for Baseball Infield provide a great contrast to the white ball on a brown or neutral background. Prism lenses for Outfield provide an excellent contrast with the white ball against a blue or light color like the sky. The basic size information is below. The same chart is recreated at the bottom of this page with links each Points About This Chart: All the measurements in One millimeter 0.03937 inches. Models available with two different lens sizes are listed on the same line. These models have an xl or XLJ extension listed in brackets. The size of the XL or XLJ lenses are also listed in brackets. The diameter of the lens is also called eye size. This is a diagonal dimension, or the smallest circle that can contain this lens. A bridge is the distance between lenses. (DBL) I don't want to. The height of the lens is listed to give you a better idea of how much coverage you will get from these glasses. This is also called measurement B. Information about the transmission of light for each lens is listed on our Oakley Prescription Lens page. These are a few of Oakley's lens offerings, where lenses work best in specific situations: Each lens color option is available in any model when ordering prescription glasses. Each over-the-counter model will have multiple lens choices, but Oakley offers so many options that it is not practical to make every lens option available in each model. Just call us if you need help finding a model with the lens you want. See our full Oakley Sunglasses Lens color/light transfer chart Oakley Sunglasses Types Oakley Semi-Rimless Rx Sunglasses provides an unobstructed view through the bottom of the lens. The lenses are hooked to the frame using two hooks on the upper corners of each lens. The most popular of this type listed from the smallest to the largest are the quarter jacket, bottle rocket, half jacket 2.0 (XL), Flak jacket (XLJ), and Flak 2.0 (XL). The larger size of the lens does not change the size of the frame. Shop All Oakley Semi-Rimless Sunglasses Oakley Full Frame Sunglasses Full Frame provides the best security lens with a frame that goes all the way around the lens. Full shots are a good option for those heavier recipes because the frame will hide some of the excess thickness. This includes all metallic frame sunglasses. Shop All Oakley Full Frame Sunglasses Radar-Lock Switch Lock Technology This chart is shown above in a more concise format. We play with this stuff all the time. As oakley Surfaces Recipe Sun Lenses Oakley uses a loose form, digital lens surfacing method. Using advanced calculations and computer-controlled Rx equipment to cover, Oakley recalculates your recipe at each point on the back of each lens to give you much more of the lens space used, with sharp optics that extend to the peripheral parts of the lenses. Advanced recipe calculation takes into account the distance between the eyes as a starting point, the distance from the eyes to the back of the lens, and the tilt of the lens, and then merge the information with your recipe to create a very detailed and personalized recipe map that provides you with the best vision. This technology has eliminated the problem of peripheral distortion, commonly known as the installation of standard lenses in sunglasses with a wrapped frame. Do you need an Oakley lens recipe for a frame that you already have? There are several options when ordering a lens just for Oakley sunglasses frames that you already have. You can either order the lenses only and have them shipped to you for installation, or you can send us your frames and we will make the installation for you. We recommend that you send your frames for any metal frames, or full frame sunglasses, because they are a little harder to install. If you want us to install lenses for you, you would just send us your glasses with your order receipts printed out and included in the box. You can also write an order number on the field to help speed things up together. Use the link below to get started! Click to buy Oakley Recipe Lenses for your Oakley Sunglasses Frequently asked questions about Oakley Recipe Sunglasses My recipe in the oakley prescription range? This depends on several components including the strength of the recipe, the frame you want, and the pd measurement (the distance between the eyes in millimeters). Oakley has also recently expanded some of its limits, so if you've tried it before but couldn't get them, we may be able to help you now. The best way to find out if you're a candidate for a genuine Oakley Recipe lens is to give us a call! (855) 858-5519 What guarantee will I get when ordering Oakley sunglasses online from ADS Sports Glasses? We guarantee that your lenses will be exactly what your doctor ordered. If you find that vision in lenses is not perfect, we will find out what went wrong and it is fixed on a free basis for you. If it was a mistake on our part, we will also pay for you to send points Oakley also has an annual warranty against scratched lenses. For more information! Can I buy a recipe recipe Oakley frame lenses that I already have? Unlike many other online dealers, we offer lens-only sales and don't charge a premium for not buying a frame. You have the choice of either sending us your frame to install lenses or with lenses supplied to you for you to install. Please note that if you decide to install the lenses yourself, we cannot guarantee against any breakdowns that may occur. Do you offer new Oakley Edge lenses for higher-powered recipes? We offer lenses from the new Oakley Edge recipe program. Read our Oakley Edge information page for more information on how lenses work and what your capabilities are. The specialty Oakley Edge lens is only \$40 more expensive than standard Oakley True Digital lenses. How long does it take to get my Oakley recipe ordered? Although there is no guaranteed time to receive Oakley prescription orders, we get them back from Oakley Lab in about a week and a half. Full Oakley Rx orders (frame and lens) get free UPS shipping 2 days, lens or frame-only order will receive free UPS ground delivery. Can you send me if I live outside the US? We are an authorized Oakley dealer in the US so we are unable to ship out of the country. Most people in this situation have us send their order to a friend or relative in the states who can send a package to them. Will Oakley make a prescription lens for my favorite sunglasses that are discontinued? Oakley makes prescription lenses for some of its discontinued models. The best thing to do is to call us and we will call their lab to find out if your model's Rx lenses are still in production.
