

**Tuesday 09:30 – 10:00**

**New cell therapy facility at Leiden Bio Science**

*Arjen Schippers, Senior Director and Program Head of Bristol Myers Squibb (BMS)*

Arjen Schippers, Senior Director and Program Head of the Bristol Myers Squibb (BMS) first European Cell therapy facility, will walk you through the considerations of establishing the state-of-the-art manufacturing site in Leiden. It is BMS' continuing commitment to patients with aggressive hematological cancers and its growing cell therapy presence, to further expand in this area to fulfil the needs of European patients. He will give insights on what exactly CAR T cell therapy is about and how the manufacturing process is working. Finally he will share BMS' view into the future and illustrate why Leiden was selected as the best option for the company's cell therapy manufacturing facility.
