C-22 Glossary Index xx MC75 User's Guide About this guide Introduction This guide contains information about using mc75 Enterprise Digital Assistant (EDA) and accessories. NOTE The screens and windows shown in this guide are samples and may differ from actual screens. For more information about the new features, see Appendix C, Windows Mobile 6.5 with OEM version 03.38.000X, and Windows Mobile 6.5. Documentation Set The mc75 documentation set provides information for specific user needs and includes: -MC75 QuickStart - describes how to use MC75 EDA up and running -MC75 User's Guide - describes how to use MC75 EDA -MC75 Integrator Guide - describes how to set up mc75 EDAs and accessories. -The Microsoft User's @ Windows Mobile 6.0 for enterprise mobility devices describes how to use apps developed by Microsoft. -Enterprise Mobility App Guide - Describes how to use sample applications developed by enterprise user. -Enterprise Mobility Help File Kit (EMDK) - Provides api information for writing applications. Configuration This guide deals with the following configurations: Configuration radios display memory collection operating keyboard system MC7506 WPAN: Bluetooth 3.5 VGA 128 MB RAM / 1D laser Windows Numeric, WWAN: HSDPA Color 256 MB Flash Scanner, 2D Mobile 6 X QWERTY, GPS: SIRF III Imager Professional AZERTY or QWERTZ keyboard MC7598 WLAN: 802.11a/b/g 3.5 VGA 128 MB RAM / 1D laser Windows Numeric, WPAN: Bluetooth Color 256 MB Flash Scanner, 2D Mobile 6 X DSD, WWAN: HSDPA or 128 MB Imager, 1D Laser Professional QWERTY, GPS: SIRF III RAM/512 MB Scanner with AZERTY or Flash 2MP Camera, 2D QWERTZ imager with 2MP keyboard camera MC7598 WLAN: 802.11a/b/g 3.5 VGA 128 MB RAM / 1D laser Windows Numeric, WPAN: Bluetooth Color 256 MB Flash Scanner, 2D Mobile 6 X QWERTY, WWAN: EVDO or 128 MB Imager, 1D Laser Professional AZERTY or GPS: SIRF III RAM/512 MB Scanner with QWERTZ Flash 2MP Camera, 2D Keyboard Imager with 2MP Camera Software Version This guide covers software configurations and links are intended for operating system or software versions for: -Adaptation Kit Update (AKU) version -OEM version -Phone version -BTE Explorer version -Fusion version -Phone version, AKU Version To specify the version of the adaptation set update (AKU): Click Start > Settings > System > icon > Version tab. The second line lists the operating system version and assembly number. The last part of the assembly number represents the AKU number. For example, assembly 18552.07.5 indicates that the device is using AKU version 0.7.5. OEM version To specify the OEM software version: Click the Run tab > Settings > System > icon > System information tab. BTE Explorer Software To determine the version of the BTE Explorer software. Note For configurations running Windows Mobile 6.5, click Start > Explorer > Menu > About to view version information. Click the BTE Explorer icon > View BTE Explorer > Menu > O. BTE Explorer Fusion Software icon To determine the fusion version: Tap the signal strength icon > Wireless Status > version. Phone Software Signal Strength Icon To determine the version of your phone's software: Tap start button > Phone Menu > > Options > phone information or version information.

Descriptions of the chapters The topics in this guide are as follows: -Chapter 1 Getting Started provides information about the first commissioning of the MC75. -Chapter 2, Using MC75 contains basic guidelines for using MC75, including turning on and resetting MC75, and entering and capturing data. -Chapter 3, Using GPS navigation provides information about GPS navigation with MC75. -Chapter 4, Using Bluetooth explains bluetooth function on MC75. -Chapter 5, Using your phone contains basic instructions for using your MC75. -Chapter 6, Accessories describe the available accessories and how to use them with MC75. -Chapter 7, Maintenance and Troubleshooting provides instructions for cleaning and storing MC75 and provides solutions to solve potential problems during MC75 operation. -Appendix A, Technical specifications provide technical specifications for MC75. -Appendix B, Voice Quality Manager provides information for using Voice Quality Manager software. Notation conventions The following conventions are used in this document: -EDA refers to manual computers in the Motorola MC75 series. -Italics are used to highlight the following: -Chapters and sections in this and related documents -Icons on the screen. User's Guide xxiv MC75 -Bold text is used to highlight the following: -Names of dialog boxes, windows and screens -Names of drop-down lists and lists -Ponytail names and radio buttons -Key names on the keyboard -On-screen button names. -Bullets (•) indicate: -Action items -Lists of alternatives -Lists of required steps that are necessarily sequential -Sequential lists (e.g. lists that describe step-by-step procedures) appear as numbered lists. Related documents -MC75 QuickStart, pin 72-103079-xx. -Windows Mobile 6 MC75 Regulatory Guide, No. 72-103080-xx. -MC75 Integrator Guide, No. 72E-103078-xx. -Microsoft user guide Applications for Mobile 6, pin 72E-108299-xx -Enterprise Mobility Application Guide, pin 72E-68901-xx -Enterprise Mobility Developer Kits (EMDK), available at: . -The latest ActiveSync software available at: . For the latest version of this guide and all guides, see: . Service information If you have an equipment problem, contact Motorola Enterprise Mobility support for your region. Contact information is available at: . When contacting Enterprise Mobility Support, please have the following information available: -Unit serial number -Model number and Motorola version number responds to calls by email, telephone or fax within the time limits set in the support agreements. If you can't resolve your issue with Motorola Enterprise Mobility Support, you may need to return your device to service and be provided with specific instructions. Motorola shall not be liable for damages incurred during transport unless an approved shipping container is used. Incorrect transport of units may cancel the warranty if necessary. If you purchased an Enterprise Mobility business product from a Motorola business partner, contact that business partner for support. xx MC75 User's Guide Chapter 1 Getting Started Introduction This chapter lists parts and accessories for the MC75 and explains how to install and charge batteries.

Make sure you have connected the following: -MC75 EDA -Lithium-ion battery with 3600 mAh -Battery cover/strap assembly -Tethered styluses -Protective overlay, installed on the display window -Regulatory -Quick start guide. Check that the device is not damaged. If any of the devices are missing or damaged, please contact Mobility Support Center immediately. Contact information can be found on page xviii. Accessories Table 1-1 lists the accessories available for MC75. Table 1-1 MC75 Accessories Accessories Description of cradle part number One USB/Serial CRD7X00-1000R Charging the main MC75 battery and spare battery. The cradle syncs the MC75 to the host computer via a USB connection. Four Cradle CRD7X00-4000R Ethernet slots Charge the main MC75 battery and connect the MC75 to an Ethernet network. Only four CRD7X00-4000CR slots charge up to four MC75 devices. Cradle VCD7000 Vehicle cradle VCD7X00-9000R Installs in the vehicle and recharges the main MC75 battery and spare battery. Provides serial data communication between mc75 and external device. Chargers Four slot battery charger SAC7X00-4000CR Charging up to four MC75 replacement batteries. Includes MC75 washer. Serial charging cable 25-102776-01R Provides mc75 power and serial communication with the host computer. Usb 25-102775-01R charging cable Provides mc75 power and USB communication with the host computer. Charging cable 25-95214-02R Provides power to mc75. Auto Charge Cable 25-70979-01R Charges MC75 using the vehicle lighter. DEX Cable 25-76793-01R Connects mc75 to vending machine. Modem charger cables 25-70924-03R Modem converter cable. O'Neil Printer Cable 25-91519-01R Printer cable for O'Neil printers. Zebra printer cable 25-91518-01R Zebra Road Warrior printers. Zebra Printer Cable 25-91515-01R Printer cable for Zebra QL printers. Various Magnetic Strips Reader MSR7000-100R Snaps on MC75 and adds magstripe read (MSR) capabilities. DCR7X00-100R debit card reader Allows easy data collection using a magnetic stripe card and entering a personal identification number (PIN) using a numeric keypad. Snap-on Mobile Payment DCR7X00-200R Allows easy data collection with magnetic card stripe. EMV module with chip and PIN compatible chip and PIN card and personal identification number (PIN) input using numeric keypad. Table 1-1 MC75 Accessories (continued) Accessories Part Number Name Biometric attachment MC7XPRP-01R Contains fingerprint reader. The MC7XPRP-01R biometric attachment includes a fingerprint reader, a smart card reader for contact, and a contactless smart card reader. The Dongle MD4800-100R modem provides modem connectivity. Replacement 3600 mAh BTRY-MC7XEA00 Replacement 3600 mAh battery. Lithium-ion battery Spare 4500 mAh BTRY-MC7XEA00H Optional 4800 mAh battery. lithium-ion battery pack for 3600 mah BTRY-KT-1RSX-MC7XR Replacement 3600 mah battery and door battery. Battery pack for 4800 mah BTRY-KT-2RSX-MC7XR Replacement 4800 mah batteries and battery door. Battery Headset 50-11300-050R Use in noisy environments. Belt mounted rigid housing SG-MC7001110-01R Belt clamps hold MC75 when in operation. Fabric case SG-MC7521215-01R Soft holder for increased protection. Stylus Stylus-00002-02R Spare stylus (3 packs). Wall mounting kit 8710-050006-01R Use for mounting four slotted cradles. Screen protection KT-67525-01R Package 3 screen protectors. Software - Enterprise Mobility Developer Kits (EMDK) available at: . Getting started: Start using the MC75 for the first time: -install the SIM card (MC7506 and MC7596 only) -install the main battery. -Charge the mc75. -Turn on mc75. -Configure mc75. Install only the NOTE MC7506 and MC7596

SIM card configurations. GSM phone service requires a Subscriber Identification Module (SIM) card or a smart card. Get this card from your service provider. The card will fit in mc75 and may contain the following information: •Mobile Phone Service Provider account details. •Information on access to services and preferences. •Contact information that can be moved to contacts on MC75. •Any other services you have signed up for. NOTE For more information about SIM cards, see your service provider's documentation. Installing the SIM card: 1.Lift the SIM card cover with the tip of the pen. Figure 1-3 Lifting the SIM card cover 2.Insert the SIM card, as shown in Figure 1-4, with the cutting edge of the card facing outwards and the contacts facing down. Figure 1-4 Insert a SIM card 3.Fold down the SIM card cover and use the pen tip to move it into place. 4.Install the battery. For more information, see Install the main battery on page 1-6. 5.After the initial MC75 setup is complete or after replacing the SIM card, a. Press the red power button. b.Na Today screen, tap Wireless Network Manager. c.Make sure your phone is turned on. • Press the red power button to pause mc75. • Make a warm shoe. See MC75 Recovery on page 2-15. 1.Call and verify your mobile connection. NOTE For detailed information about how to activate and set up WMAN, refer to the MC75 integrator's manual. The MC75 main battery installation comes with a 3600 mAh battery. An optional 4800 mAh battery is available. Installing the main battery. 1.Insert the battery, above, into the battery compartment at the back of the MC75. NOTE: Place the battery correctly, with the battery charging contacts on top of the charging contacts in the battery compartment. 2.Push the battery down into the battery compartment until the battery release latch locks into place. Battery cover Latch cover latch Latch Figure 1-5 Insert the battery 3.With the battery cover latches open, insert the cover, bottom first, then press down on top of the cover. 4.Close the battery cover latches on both sides of the battery cover. 5.Insert the handstrap through the hole for the hand trap, then tighten and press down to secure. Hand strap On the slit 1-6 Insertion of the MC75 handstrap after inserting the battery and replacing the battery cover. Charging the battery BE CAREFUL. Make sure you follow the battery safety instructions described in the battery safety instructions on page 7-2. Charge the main battery and the backup memory battery Before using the MC75 for the first time, charge the main battery until the orange charging/battery status light remains on (see Table 1-2 on page 1-8 for information on the charging status). To charge the MC75, use a cable or cradle with the appropriate power supply. For information on accessories available for mc75, see Chapter 6 Accessories. The MC75 features a backup memory that automatically charges from a fully charged main battery. The first time you use the MC75, the backup battery requires a full charge of approximately 36 hours. This is also true every time the backup battery is discharged, which occurs when the main battery is removed for several hours. The backup battery keeps ram data in memory for at least 15 minutes (at room temperature) when the main MC75 battery is removed. When the MC75 reaches a very low battery level, the combination of the main battery and the backup battery keeps the RAM data in memory for at least 48 hours. To charge the main battery, use a charging cable or cradle. For procedures for adjusting cables and cradles and charging, refer to the MC75 integrator manual. •USB/series cradle with one slot •Four-slot Ethernet cradle •Four-colour charged cradle only •Cradle of the vehicle. Charging the main battery. 1.Connect the charging accessory to the appropriate power supply. 2.Insert the MC75 into the cradle or attach to the cable. The MC75 will start charging. LED Charging/battery status flashes orange when charging and lights up orange when fully charged. Charging data are given in Table 1-2. The 3600 mAh battery will fully charge in approximately five hours and the 4800 mAh battery will charge in approximately seven hours. Table 1-2 CHARGING LEDs Charging indicators Charging / battery indication LED status off MC75 is not charging. The MC75 is not properly inserted into the cradle or connected to a power supply. The charger/cradle is not powered. The slow-flashing Amber MC75 is charging. (1. wink every 2 seconds) Solid Amber Charging complete. Note: When the battery is initially inserted into the mc75, the yellow LED flashes once if the battery is low or not fully inserted. Amber charging flashing error, e.g. (2 blinks per second) = Temperature is too low or too high. • Charging takes too long without completion (usually eight hours). A single flashing amber (when the battery is low. Power button pressed) Flashes orange (when the battery is oversteered. Power button pressed) To charge replacement batteries, see Chapter 6, Accessories for information on the use of replacement replacement accessories. Charging The battery with charge temperature at temperatures from 40°C (32 to 104°F). Charging is intelligently controlled by mc75. For this result, for a small period of time, the MC75 or accessory alternately allows and turns off battery charging to keep the battery at acceptable temperatures. MC75 or accessories indicate when charging is turned off due to abnormal temperatures via the LED. See Table 1-2. Turn on the MC75 Press the power button to turn on the MC75. If the MC75 does not start, make a warm shoe. See Restore mc75 on page 2-15. The first time you turn on mc75, the start screen appears for about a minute when mc75 initializes its flash file system and then a calibration window appears. Note that these windows also appear during a cold boot. NOTE When the mc75 charges after the first battery insertion, the device automatically starts and turns on. Screen calibration To calibrate the screen so that the cursor on the touch screen is aligned with the tip of the stylus: 1.Remove the pens from the holder on the back of the MC75. 2.Carefully press and briefly hold in the center of each target that appears on the screen. 3.Repeat as the target moves around the screen, and then tap the screen to continue. Battery Status Check To check the charge status of the main battery or backup battery in mc75, click start >g>. Settings >g> System tab >g> Power to replay the Power window. To save battery power, tap the Advanced tab and set the MC75 card to turn off after a specified number of minutes. The Micro Secure Digital (microSD) MicroSD Card Slot card provides secondary non-volatile storage. The slot is located on the MC75 side (see Figure 1-7). For more information, refer to the documentation that came with your card and follow the manufacturer's recommendations for use. WARNING Observe the correct ESD security measures to prevent damage to the microSD card. The correct safety measures of the ECI include, inter alia, working on the ECJ mat and ensuring proper grounding of the center. MicroSD Card installation: 1.Power off MC75. 2.Remove the memory card cover on the MC75 side by releasing two captured screws. Figure 1-7 Installing the card 3.Insert the card with the card contacts pointing up and the cut corner to the left until you feel a click. 4.Replace the memory card cover and tighten the screws. Removing the microSD card: 1.Power from mc75. 2.Remove the memory card cover by loosening the screws. Figure 1-8 Removing the card 3.Carefully press and release the card to eject it. 4.Remove the card from the card slot. 5.Replace the memory card cover and tighten the screws. The MC75 handstrap setting is attached to the bottom of the battery cover. Set a hand trap to increase the comfort of holding the MC75 for an extended period of time. Setting the handstrap: 1.I will cover the hand trap with a hole for a hand trap in both directions, tighten or release. 2.Secure the handstrap by squeezing both sides together, as shown in Figure 1-9. Figure 1-9 Setting the handstrap Removing the screen protector On the MC75, the screen protector is applied. Motorola recommends using it to minimize wear. Screen protectors increase the usability and durability of touchscreens. To remove the screen protector, lift the corner with a thin plastic card, such as a credit card, and then carefully lift it from the display. Lift the screen protector Corner Figure 1-10 Removing the screen protector CAUTION Do not use a sharp object to remove the protector. This may damage the display. NOTE Not using the screen protector may affect warranty coverage. To purchase replacement protectors, contact your local account administrator or Motorola, Inc. These include instructions on how to install the screen protector. Part number: KT-67525-01R Screen protector 3/3k. Replacing the main battery 1.Press the red power button to pause the mc75. 2.Looseen the arm strap. 3.Open the battery cover latches on both sides of the battery cover. Battery cover Figure 1-11 Remove the battery cover 4.Lift the top of the battery cover and remove. 5.Press the battery release latch on the underside of the battery to unlock and remove the battery from the well. 6.Insert the spare battery, above, into the battery compartment at the back of the MC75. 7.Push the main battery down into the battery compartment until the battery release latch locks into place. NOTE Place the battery correctly, with the battery charging contacts on top of the charging contacts in the battery compartment. 8.With the battery cover latches open, insert the cover, first the bottom, and then press down on the top of the cover. 9.Close the battery cover latches on both sides of the battery cover. 10.Insert the handstrap through the hole for the hand trap, then tighten and press down to secure. The MC75 turns on when the battery is inserted and the battery cover is replaced. Battery Management Follow these battery
saving tips: NOTE The factory default mc75 settings for WMAN and WLAN radios are set on. •If not in use, leave the mc75 connected to the AC power supply. •Set the MC75 to turn off after a short period of non-use. •Adjust the backlight so that it does not use after a short period of time. •Turn off all wireless activities when not in use. •Turn off the MC75 while charging at a faster pace. Change power settings: Set mc75 to shutdown after a short period of time of non-use: 1.Click the Start tab >g>. Settings >g> System >g> Power icon >g>. Advanced tab. 3.Select ok. Change backlight settings To change backlight settings to save more battery power: 1.Tap Start >g>. Settings >g> System tab >g>. Backlight icon >g>. Battery Tab. 2.Select the Disable backlight if the device is not used for the check box check box check box. and select a value from the drop-down list. 4.Click the Disable backlight check box to turn off the display backlight or use the slider to set a low backlight value. 5.Select ok. Change keyboard backlight settings To change the keyboard backlight settings to save more battery power: 1.Tap Start >g>. Settings >g> System tab >g>. Button icon >g>. Battery Power tab. 2.Select turn on battery power: Disable Keylight if it is not used for the check box check box check box, and select a value from the drop-down list. 3.Select the Advanced tab. 4.Click the Disable keyboard feature check box to turn off keyboard backlight. 5.Select ok. Turn off radio note On Devices running Windows Mobile 6.5.3, see Status Bar on page C-5 for more information. Windows Mobile 6 devices include a wireless network administrator that provides a simple way to enable, disable, and configure all wireless features of your device in one place. To open Wireless Network Manager, tap the Connections icon, or tap Wireless Network Manager on the Today screen. Connection icon Figure 1-12 Open select wireless manager Figure 1-13 Wireless Manager Window Features Note Wireless options vary depending on configuration. To enable or disable wireless connectivity, click a specific button. To enable or disable all wireless connections, click All. To configure connection settings, click Menu. Figure 1-14 Wireless Manager Menu Chapter 2 Using MC75 Introduction This chapter explains the buttons, status icons and controls on the MC75 and provides basic instructions for using MC75, including turning on and resetting MC75, and entering and data capture. Standard MC75 radio states are: •Bluetooth - OFF •Phone - ON •Wireless LAN - ON. Today, the Screen Note On Windows Mobile 6.5.3 devices, the Today screen is different. For more information, see C-1. The Today screen displays important information, such as upcoming events and status indicators. Click the section on the screen to open the associated program. Alternatively, tap Start >g>. Today to view the Today screen. Wan Connection Status notifications Adjust volume Open start menu Battery status Change date and time Change date and time, alarm settings and more turn on or off radios BT Explorer Wireless Applications Command Panel Soft Keys Picture 2-1 Today Screen To customize the Today screen, click Start >g>. Settings >g>. Today. You can use the Appearance tab to customize the background and items tab, and to change the list and order of items that appear on the Note status icons On Windows Mobile 6.5.3 devices, see Status Bar on page C-5 for more information. The navigation bar at the top of the screen may contain status icons listed in Table 2-1. Table status 2-1 Description of the Battery Backup Notification icon feature is low. A notification that one or more instant messages have been received. Notification that one or more e-mail messages have been received. Notification that one or more voice messages have been received. There are more notification icons than can be displayed. Click to see the remaining icons. Indicates a reminder for an upcoming calendar event. Table 2-1 Status icons (continuation) Description Function Connection connection is active. The connection is not active. Synchronization is in place. Wi-Fi is available. HSDPA available. (MC7506 and MC7596) 3G available. (MC7506 and MC7596) GPRS available. (MC7506 and MC7596) EGPRS available. (MC7506 and MC7596) 4xRTT available. (MC7508 and MC7598) EVDO Rev. 0 available. (MC7508 and MC7598) EVDO Rev. Available. (MC7508 and MC7598) Dormant state - no data transfer within 1x or EVDO connection. (MC7508 and MC7598) Table 2-1 Status icons (continuation) Description of wan function calls missed. Dial when no SIM card is installed. A voice call is in progress. Calls are forwarded. Hold.
