It's the first FIFA game to use licensed leagues instead of official teams like England, Brazil, Colombia, and Argentina, and the first to feature eleven teams. This is the first game of the FIFA series to feature several features that improve player interaction with the game, such as the ability to drop and lift players from the bench, and new player attributes including the ability to press opponents for possession, draw fouls, and dribble the ball out of defense, as well as control a player's ball possession through the player's heart or head. Release Reception The editors of Computer Gaming World noted the similarity of the game to The Journeyman Project, and praised its "overall pleasing appearance" and "intuitive controls." They recommended the game in their November 1993 issue. The game was a finalist for Computer Game Of The Year at the Academy of Interactive Arts & Sciences' 1994 Interactive Achievement Awards. Legacy In March 2014, EA announced FIFA 14 would be the first in a series of "Team of the Year" updates, with the Arsenal of England, Celtic of Scotland, Chelsea of England, Bayern Munich of Germany, Real Madrid of Spain, and AC Milan of Italy becoming the UK's, Scottish, Welsh, English, German, and Italian sides respectively.
