It contains some very biblical processes and definitions of the process of creating disciples. This shows how a leader can intentionally move disciples from spiritual infancy to the disciple-makers themselves. The last chapter provides a very practical format for a small group. Work through this book with apprentices who are almost willing to start their own work as deliberate fisherman people. ... more This book was similar in theory to the Mentor as Jesus, but the general, practical method is laid out differently. From what I've read, either one will work well. I think it's more a question of how you handle the information and how much help you need. I like that this book has been outlined less as a guide and more like Bible study with filling in the gaps, biblical passages to think about, and questions to answer. I have gone through this work book twice now and have been inspired by Jesus' simple instruction to the disciples. How do we do that? It takes a relational environment, a deliberate leader, a biblical foundation and a reproducible process. The reproducible process is the focus of the material in this book. Read this to better apprentice anyone! August 26, 2019 Hilary appreciated it was a surprisingly clear explanation of biblical discipleship. It's useful and practical if you're trying to identify people for and how to do it. September 10, 2020 Jessica appreciated it liked, recommended jessica: my church had some good information and it really made me think about some things. However, however, A bit repetitive and not quite the format I wanted to learn and work best. On March 28, 2016 Mike appreciated it was a ok review of another edition the best I got from this book was to be intentional in a pupil-making. However, there were a few moments when the author's arminism always avenged and distracted from the process of discipleship. He regularly talked about choosing Christ when no one chooses Christ. Rather, He chooses us. He talked about apprenticeship as a game or a team sport. I think the analogy breaks down too quickly to be a good application. Apprenticeship is much more important than a meaningless game. Also in the game, you can't be sure of the result, while the apprenticeship will always be done. In the last week of the study, the author spoke of stories of Biblical stories without directly referring to the scriptures. I could not imagine the benefits of such an approach. To paraphrase biblical history is a great way to twist history according to whatever purpose you want it to be about. I know biblical stories. I've read them my whole life. But I wouldn't trust myself to lead a small group just by telling from memory what a biblical story is. God gave us His Word. Many died to bring us the written Word of God. Why then will we seek to tell stories other than the Holy Spirit inspired by the canonical text? ... This makes the abstract, subjective process more practical and applicable. I highly recommend it. That's what I missed. I think it's best to read with the actual book that goes along with it though.
