Kiss in the rain violin sheet music

1 of 17 How is it in words? We have guys to discover about the little details that made certain kisses their most smoking ever. 2 of the 17 Slow Jam In a very sweaty crowd at this music festival, this gorgeous girl and I ended up doing as we grinded to the music. The best part, however, was that we started passing the ice cube back and forth as we kissed. The warmth from her tongue and the coolness of the ice felt very good. Andy R. 3 of the 17th Dinner Service I think it's really sexy when my girlfriend runs her hands down my breasts as she kisses me. One night, as we were cooking dinner together in the kitchen, she turned away from the stripped-down board and started doing it while we were cuddling. It wasn't long before we steamed the whole kitchen. Avi L. 4 of 17 Flash Dance It happened on a dark dance floor with a girl I had been in love with for months. (Clijo, I know.) Halfway to the song we danced to, she hugged me by the neck and quickly dragged me, but didn't kiss me right away. Instead, she moved her lips around my ears and cheeks as they slowly made their way to my mouth. Then she kissed me, her teeth slightly scraping off my upper lip, her hand hanging from the back of my head. She held on to the use of language until the very end. It was hot. Adam S. 5 of 17 Surprise, Surprise Best Kisses from My Now Wife Is Always the Most Unexpected. One day, she surprised me by stopping me out of nowhere for a sexual kiss with her mouth open, like while walking on a busy city street. We kept it relatively classy, but the fact that he was public and the spurs-in-the-moment made it all hotter. Adam K. 6 of the 17 Eye Spy I waited about six months for my memorable kiss. I spent a lot of time with a friend who is so attractive that it's crazy. We were in her bed when I stayed for one night and we both couldn't sleep. Soon, we looked into each other's eyes, god knows how long before we finally kissed. This led to some really intense sex right after. Max S. 7 of the 17 Get Schooled Sweet Girl I knew from one of my classes came up to me in the middle of the party and told me that was something she had wanted to do for a very long time. Seconds later, she gave me one of the wildest kisses I've ever received. Her ballsiness kept it on my head ages after it happened (not to mention a trip to one of the nearby bedrooms we took afterwards). Alan A. 8 of the 17 Hand Check I love when a girl's hand finds its way to my collar and tugs at it just a little bit to bring me into it. It's also a big twist if I hear or feel the release of her breath as she kisses me. It happened once to a girl I've known for ages, and I still can't stop thinking about it. AM 9 of the 17 Totally Floored I was lying on the floor talking to a girl. I designed a thing in a new town. It was tempting to put a move on it, but I wanted to see gentleman (and also wasn't sure if she was in me). After we finally decided to call it a night and I closed my eyes to the side, she completely caught me by surprise, pushing me and saying: Hey... As soon as I turned to her face, she took my face in her hand and kissed me. Mitchell S. 10 of 17 Easy Lee It's I Met This Girl a few years ago through mutual friends and some interest is definitely putting out, despite the fact we'd only hung out in groups. We were both at our friend's house one weekend and ended up riding home together. After deciding to enjoy some of the first only time we ever scored wandering around, we finally said goodbye, but not without it moving in for a peck I've never seen coming. She was a very soft kisser. Ron. 11 of the 17 Creating Waves I was in one of the local bars next to me and ended up hitting it with a really cool brunette. We ended up going for a walk near the beach and stumbled upon an empty lifeguard stand. She joked about working out on it, and soon we were in a chair. As soon as we got up, though, and looking at the ocean, it felt like the sky had exploded. He started pouring and the man he felt good. We took one look at each other and it was on! There we were, in the middle of a serious makeup session on the lifeguard chair ... On the beach... Under the pouring rain... overlooking the ocean. We got wet, but we didn't care. It just felt great. We found ourselves in the ocean, kissing as the waves crashed on us and our clothes lay on the sand. Definitely one of those holy shit: Life is awesome moments. Dan S. 12 of the 17 Lip Service One night, I kissed this girl and it almost became as much a connecting highlight as the actual foreplay. We sucked each other's lips so hard that by the end of the night they were completely swollen. We continued to shift back and forth, each person going harder and longer than in the past, refusing to give the other lower or upper lip backit was like a hot way of one upping each other. Devon T. 13 of 17 Not-So-Shy In college, there was this very hot but shy girl that I've been chasing for some time. My friends had a party one night and she came with her team but behaved quite quietly and reserved most of the time. As things finished down, we ended up being two of the last ones there. I offered to take her home, and when we got to her dorm door, I thought she'd just thank me and go inside, as she didn't give me any indication that she was interested all night. To my surprise, she turned around, pressed me against the wall, and kissed me as she was in complete control and knew exactly what she was doing. It totally won me over. Jesse A. 14 of 17 Risky Behavior Always the biggest player for me when it comes to my favorite makeup sessions with my girlfriend. If we sneak out somewhere at night, for a walk for entertainment entertainment or stealing kisses next to another passenger on the plane, the riskier the seat, the better. Chad B. 15 of 17 Double Duty This one girl I hooked crossed between stroking my head and grabbing my hair as she kissed me. Head rubbing was soothing, but hair grabbing introduced me. I knew she was in charge and felt rude. It was a really amazing and stimulating combo for me. Garrett G. 16 of the 17 All Tied Up I have been dating this girl for three years and she was always ready to explore new things. One day she said she wanted to tie me up and blindfolded me. Once it was on, I had no idea what to expect. My mind ran wild and suddenly I felt her lips touch mine. Having no idea that this soft, sensual and seemingly innocent peck will serve as a knife to make it the best ever. Alex B. 17 of 17 Soft Touch After a big date, everything swerved and we could both feel the kiss coming. I bent down slowly and just as our lips touched, she gently licked my upper lip and came off a bit. After that, I wanted it even more, but played cool, leaning slowly again. As our lips touched, she gently bit my lower lip. It was all I could take, and it was on. Well played, well played . Luke H. Travel is an endless source of inspiration, and most of the time I had to leave my violin at home because it was too hard to wear such a delicate instrument with me. Finally, I started to create a reliable and modular version of the violin that I could put in my backpack. More information on this siteMei started while traveling in Africa while visiting various developing projects in southern Tanzania. Later, I continued to develop the archetype originally built during this trip, finding a way to strengthen it, improve the proportion, keep the setting ... After many different tests, we have developed different models, following some basic principles: Sizes and proportions are the same as classical violin. -Violin maintenance is the same (same bridge, keys, strings...) - The sound is generated by the vibration of wood, leather and metal (and not just from strings) - the instrument is modular and reliable. -The handle allows you to insert various harmonic resonators, shoulder stands and electronic devices. By creating these violins, we are inspired by ethnic and ancient instruments, trying to reproduce similar resonators that can be put on our universal pen. The tools that fascinated us the most ekhtara, vioara cu goarna, calababas, viella, and kamancheh. To condense all these principles on the same violin, we had to go through several tests. Finally, we were able to create a good tool using the following set of materials: -sooden (mostly from local wood (oak, beech, mahogany) 4x6x30cm around 5-6E-hollow metal pole 1x40cm 3E/m -Olive, padauk 4 -4 Pin, 10-12E -string holder 10E-row 20E -bridge 5E -audio cable 1E/m -jack 2E -2 piezo, 1E -2-3 trimmers 110kOhm 3-5E Construction) -Sanding 3E -Glue 0.5E -Varnish 1E-Concept We worked on the simplicity of the shape, retaining inspiration from simple geometric shapes. 2D and 3D draws are available in the projects section. After many tests, we've dealt with the best materials for functionality and hue combinations. Some forests where they are taken out of the territory (olives, valut, cherry, castany). This allowed us to choose the direction of the cut and store the slices of wood in a dry and ventilated warehouse.-HandleThe pen is built with respect to the exact size of the acoustic violin and retains the same references to the hand. Usually it is made of oak, mohan, buha... The top has different shapes depending on the type of resonator for which it is built. We especially like the shape of the crown pit. The total length is about 63 cm. There is a link attached to the left side of the handle to balance the shoulder rest on the right side. Fingerboards retain their original size and are usually made of paduk or olives. As a rule, we blur a wooden knot in the shape of a diamond in the middle of the casing. This feature is typical of the olive tree. -Shoulder rest can be built between the handle and the string holder. This one piece is designed to sit on the chest and shoulder. It can be extracted to reduce the lateral size of the violin during transportation. The shoulder rests extremely customizable according to the posture of the violinist. They are designed/sized to balance the overall weight of the violin and shift the center of the mass to the body to release the load on the left hand.-Resonator First, we have tried different types of resonators from bamboo segments, coconuts, pumpkins or more complex shapes obtained using wood slices. The most effective resonator was the bamboo segment, the length of which was half the total length of the string. This simple resonator was extremely rich in harmonics, and the sustain was lengthy. Without amplification, the sound is gentle and does not bother the neighbors. We tried resonators with parts of leather, metal, springs to mechanically develop and enrich the sound.-AmplificationWe put two contact microphones (piezoelectric) inside all the resonators we built. A thin layer of wax filters have false vibrations. The microphones have different characteristic resonant frequencies, the less around 2.8kHz resonates and it is closer to the bridge, the more resonates around 4.6 kHz, and it is further from the bridge. The short distance between the two microphones introduces natural reverb and the mixture between the two microphones to build the characteristic sound of the violin. -Harmonic analysis We analyzed and compared the power audio of electric and classical violin recording with environmental microphones. We calculated the average time spectrum using a bodline. In the picture was played line A. We can see that the electric violin is rich in harmonics, although the classical violin is stronger in the low-frequency range. For lacquer I have experimented with various methods to navigate around varnishes, shine, soaks, dyes, stains, wax, oils ... In the end I decided: I) grinding 40 II) grinding 180 III) grinding sponge IV) grinding 400 V) oil wiping VI) the first passage of transparent glitter rubbed the bleeding of VIb) light grinding 400 VII) the second passage of the glitter. Envelope is a simple textil bag with soft upholstery, straps connect the bottom with circuit strips. Violins without shoulder injections are more compact and have no fragile details. Parts.
