FOLLOW US I found on the Internet what can be a grueling experience trying one reader and then another, satisfaction in finding a comprehensive display of the reader's book. Often, for me, the search ended with further disappointment finding readers of applications that are almost always accompanied by certain features, a mixture of some incompatible rules that don't fit most of our diverse options. So far, in the four months of using this app on my iPad 3, this app has performed without a malfunction. I ponder so many different subjects offered that with a reader who has no common mistakes (so far in my experience), it is a pleasure to have confidence that what I download will nest in such a decent reader. As I wish they would allow a search for titles or better yet showing titles with authors in a single list of offers. Even one display list offer will be less annoying, then have to scroll through the huge collection of items that I have invested in the reader. If you haven't tried it yet, do it! If you are trustworthy, you will be impressed. May Christ also be a blessing of love for you and yours, Robert Casey...
