You only need to visit the official website, download the EXE file, install it on your computer and you can use it. But if you want to use PLAYit on a Mac, the emulator is necessary. Please visit the installation page to find out how to install PLAYit on PCVideo loaded vidmate using Smart Muxer technology. Smart Muxer is a unique technology developed by PLAYit, can combine video and audio in a few seconds without any additional recording and storage. It really works when there are some videos that don't have an build in the audio and need to be combined into devices with low configurations. Thanks to the unique technology, video can only be played by PLAYit and other major stream players cannot support. And videos available for social apps can also be opened in PLAYit. We recommend you install PLAYit to play videos, if you are not satisfied with so much about PLAYit, you can:1.Contact the developer of the player you use to submit them to support videos with Smart Muxer.2.Turn Off Smart Muxer in VidMate settings to download the file normally, which can occur slow speed and download failure, especially when your storage is scarce. Welcome more players to support Smart Muxer and continue to provide a much better download experience with PLAYit together, sorry for the inconvenience. Now we've provided a playit to load the windows! PLAYit for Mac is under development, so stay tuned. If you don't want to wait, you can disable the Smart Muxer settings in VidMate settings for regular file downloads. Thank you for your support of PLAYit, sorry for the inconvenience. Click on this link to download the PC version. Please open the settings and include the possibility of hidden show files. Return to the screen and re-open the app when the app scan hidden files it will take some time to scan all the folders, please do not feel so slow, if you have included this setting, you can change it again.
