 <b>Motor</b>	Develops the pincer grasp	Crawls on both hands and knees	Turns pages in board books	Holds and releases objects	 Complete

6-9  
mos

# Congratulations on reaching a new milestone!

We're so happy to celebrate this momentous occasion with you. Your little one is growing so quickly. Cherish this time together and find out how to make the most of it.

Use this sheet to sit down with your caregiving partners and discuss your little one. Set goals for the upcoming month and discuss your little one's development through the lens of your nanny.

What activities would you love to see your little one do this coming month? How can you accelerate their growth? How can you further support each other?

This document is a guide, not a rule--every little one reaches milestones at different times. You and your nanny can adapt these activities to fit your child's needs.

## When your child does something new...

1 Celebrate yourself and your little one!

2 Shade in the activity on the front of this page

3 Share a picture with your loved ones

4 Continue tracking their growth!
