I'm new in creating packages, and I need help with the Web Installation Guide for Nuance® Power PDF Advanced 2.0 Table Content 1 Introduction. 3 1.1 Product Definition. 3 1.2 CD Layout 4 2 Installation prerequisites. 5 3 Installation in distributed environments. 6 3.1 Setting with Nuance 6 set 6 3.1.1 Review. 6 3.1.2 Start with set 8 3.1.3 Installation Setting 8 3.1.4 Optional: Complete the conversion file. 18 3.1.5 Adding additional components to the package. 19 3.1.6 Including existing app settings. 19 3.1.7 Completion of the package installation. 20 3.2 Customer Installation. 20 3.2.1 Customer installation using a command line. 21 3.2.2 Customer Installation using Active Directory. 39 4 Installation under Citrix Metaframe or Remote Desktop Services. 42 4.1 Installation according to Citrix Metaframe or Remote Desktop Services (formerly Terminal Services) 42 4.2 Publishing Applications. 42 4.3 Access to the established product from customers. 46 4.4 Removal. 47 5 Microsoft App-V Virtualization. 48 5.1 Review. 48 5.2 MS Office virtualization with office deployment tool 48 5.3 PDF Power Sequencing. 49 5.3.1 Preparation machine for sequencing. 49 5.3.2 Power sequencing as a plug-in for Office 2013. 50 5.4 Deployment on customer machines. 58 5.4.1 Prepare Customer 58 5.4.2 Installation Printer Driver 58 5.4.3 Deployment MS Office App-V Package. 58 5.4.4 Power Deployment PDF App-V Package. 59 5.4.5 Group connection to the kit. 59 5.4.6 Include Other Integrations (If Necessary) 60 6 Nuance Text Installation on Speech Extension Module in Distributed Environments. 61 6.1 Customer Installation. 61 6.2 Customer Installation using Active Directory. 62 This document covers the main scenarios for installing the Nuance Power PDF Advanced product. Administrative setting topics include the information you need for special deployment systems, such as Active Directory, Microsoft Systems Management Server, and System Center Configuration Manager. The document describes all the settings and installation options that you can use when setting up a product. For the system requirements of the product, see its relevant documentation (Release Notes in the ReadMe CD folder). Please note that performance and speed will be increased if your computer's processor, memory, and available storage space exceed the minimum requirements. 1.1 Definition of the Nuance Power PDF Advanced product combines PDF creation capabilities, PDF editing flexibility, and the versatility of converting a PDF into one easy-to-use, affordable app. It provides all the critical business features you need without bulky and expensive and the pre-press functions found in more expensive solutions. An extended version of the product is designed to be deployed and used in a distributed environment. In addition, it provides additional features compared to its standard version: Activation software turned off electronic product registration turned off Automatic product updates off Silent Installation Distributed Product Settings Distributed Product Settings PDF Effective editing tool to filter sensitive PDF content. Bates is a measurement tool for unequivocal identification of each page in legal document sets. Support for different document management systems. (for more information, see product release notes) 1.2 CD Layout Delivered CD contains all the mandatory components for product installation. The app has 32- and 64-bit versions. Most components of the product are 32-bit dia files regardless of the target operating system version. The PDF printer driver and some other components vary depending on the system you choose. The CD contains both versions of the product in System32 and System64 folders. The msi files for the respective versions of the product are: 'System32\Nuance Power PDF Advanced.msi' 'System64\Nuance Power PDF Advanced.msi Both folders contain \_setup.exe. Always use the appropriate version of the .msi files or \_setup.exe according to the operating system you are targeting. The installation languages supported and the associated conversion files are listed in the following table. Only one can be used at a time. Not available for beta. Language Conversion File Conversion File Chinese (traditional) 1028.mst Italian 1040.mst Chinese (simplified) 2052.mst Japanese 1041.mst Czech 10 2 9.mst Korean 1042.mst Danish 1030.mst Norwegian 1044.mst Dutch 1043.mst Polish 1045.m English 1033.mst Portuguese (Brazil) 1046.mst Finnish 1035.mst Russian 1049.mst French 1036.mst Spanish 1034.mst German 1031.mst Swedish 1053.mst Hungarian 1038.mst Turkish' 1055.mst Language specific conversion files Product requires installation of Windows v3.1 Microsoft XML Core Services 6.0 SP1 Microsoft Visual C'2015 redistributes Microsoft .NET Framework 4 packages that will be installed on client computers. If you're going to perform a standard installation procedure through Setup.exe - located in the root folder of the CD - then Setup.exe installs these software packages automatically before starting to install the product. Once the components are installed, you may need to reboot. The installation of the product continues automatically after the restart when the system is re-entered; you don't have to run Sety.exe manually again. These
