The new Xiaomi Mi Band 2 fitness bracelet features an OLED display that displays the current time, number of steps, pulse, distance traveled, calories burned and other data. There is a special control button to navigate the menu. For maximum convenience, the new Mi Band 2 features a contactless control feature that automatically displays the current time after lifting your wrist, just as it does when viewing time on a regular watch. Displaying the time Display of the steps passed Changing the heart rate Battery is 70 mAh. On a single charge MiBand is capable of running up to 20 days of Bluetooth: 4.0 version of Android 4.3 and above body and bracelet material: Aluminum, The plastic screen unlock function only works on Xiaomi devices: Xiaomi Mi3, Mi4, Redmi Note 4G, Redmi 1s 4G. iOS devices for iPhone 4s, 5, 5c, 5s, 6, 6, iPad Advanced Step Counting Algorithm The new hardware platform Xiaomi Mi Band 2 allowed to upgrade the algorithm of counting the steps passed. The fitness bracelet recognizes movements made statically and does not take them into account when counting steps. This improves the accuracy of measurements and ensures the reliability of the data. Precision to One Step: Number of Steps Periods of Activity Distance Traveled Calories Build a Chart and Improve Your Results Precision Measuring Heart Rate Physical Activity Control Xiaomi Mi Band 2 has a built-in motion sensor and heart rate monitor that captures changes in heart rate. It measures the pulse and displays data in real time, allowing you to adjust the time and intensity of physical activity depending on the heart rate. Fitness bracelet will remind you of the rest! The new Xiaomi Mi Band 2 has a reminder feature designed specifically for those who work hard and spend the whole day sitting. A fitness bracelet is able to determine the position of your body. In the case of prolonged stay in a sitting position and lack of movement, it will remind you through vibration that it would be nice to get up and warm up, get out into fresh air and recharge with energy. Bored of running alone? Jog with Mi Band 2! Running is the most affordable and effective way to keep yourself in good shape. Xiaomi Mi Band 2 paired with the Mi Fit app will make you a great company while running. They will inform you about the speed of running and the state of heart rhythm, and if necessary give appropriate recommendations. You can also use the app to develop an individual running plan aimed at burning excess fat and increasing endurance. Give the preparation a new meaning, along with the Mi Band 2 fitness bracelet Feeling weightless pleasant dreams Because of the soft strap material and light weight, the fitness bracelet is almost not felt on the arm and does not interfere during sleep. At the same time, it determines the duration and phases of slow and fast sleep. All the information you receive is displayed in the app, where you can trace and assess the quality of your sleep. Personal ID Easy to unlock without entering a password Xiaomi Mi Band 2 can act as an identifier. You can easily unlock your smartphone's screen just by bringing it to the bracelet. Notification of incoming calls and messages of applications through the vibration of the New Mi Band 2 promptly notifies the user of the incoming call or message through vibration. With it, you won't miss an important call, even in a crowded crowd on a busy street. Compliance with the international protection of the IP67 Xiaomi Mi Band 2 meets the requirements of the international IP67 standard, which guarantees dust protection and the ability to temporarily dive to the depth. It will easily pass hand washing and showering. In addition, it is resistant to cosmetics, household chemicals and sweat. Protection IP67: Waterproof Corrosion Resistance External and Internal Improvement Body of the Main Module is made by injectable casting and is coated with a special layer that protects against the effects of ultraviolet rays. It has an elegant and laconic design, resistant to scratches and fingerprints. The control button is anodized and decorated with a pattern in the form of concentric circles with a step of 0.05 mm, overflowing like a CD. Xiaomi Mi Band 2 has undergone both external and internal modernization, combining cutting-edge technology and high-quality parts. The energy-efficient OLED display, designed with a custom-made OLED display, is capable of displaying a variety of data in real time. It maintains sensory control and is characterized by low energy consumption. The new Xiaomi Mi Band 2 uses a second-generation Bluetooth 4.0 power-efficient Bluetooth 4.0 from Apple's power controller provider. It spends the charge economically and increases battery life while ensuring stable data transmission. The new Xiaomi Mi Band 2 has a unique design. The hole for the main module has internal protrusions that securely fix the main module and prevent it from sliding. The strap is decorated with a stylish button that runs in the same style as the control button on the module. The latest materials are skin friendly Unlike the first-generation fitness bracelet, the new Xiaomi Mi Band 2 strap combines two materials. The main module is positioned with a strong but elastic material that can withstand numerous manipulations associated with fixing or removing the module. The rest of the strap, which comes into contact with the skin, is made of a soft, skin-friendly breathing material, which causes a pleasant sensation when worn on the hand. Endurance Tests: High High High Up to 70 degrees Celsius: 128 hours of work in high temperatures up to -70 degrees Celsius: 128 hours of low-temperature work to -20 degrees. Drop from a height of 1.2 m: withstands up to 12 falls on the marble surface with a height of 1.2 meters Corrosion and Chemicals Resistance The new version of Mi Fit 2.0 has four sections: Status, Detection, Use and Profile. Optimization has touched on features such as step counting, sleep mode, heart rate measurement, weight determination, etc., and now they are displayed in separate sections. The new version has also been updated with the Statistics feature, which allows you to view data for the day, week and month. Mi Fit 2.0 captivates you with the simplicity and ease of use. 1. Build Xiaomi Band 2. 2. Install the Mi Sport App on your smartphone 3. Pair your smartphone with mi Band 2 4. Using Mi Band 2 5. How to charge Mi Band 2 6. Mi Band 2 7 specifications.
