## Sales invoice form pdf

Citation, sales order, purchase order, invoice, pro forma invoice and pre-account: The wide range of documents that can be used in the sales process can be overwhelming. All of them exist, however, to have a documentation trail you can turn to if you need to know the activity or status of the account. This is especially useful for products that usually have a lengthy sales process, such as technical equipment or custom products. A sales order is an agreement between the seller and the buyer to buy and sell something at a certain price, while the invoice is a payment request. To understand the difference between sales orders and invoices, it also helps to understand the difference between the terms of the order for sale and the order to buy, the order in which these documents are issued, and where the quote comes, if any. Sales quote. Buyers ask sellers for a quote or rating if they are unsure of the price of the product or service. Maybe your website lists the price of the product as \$59.99, but the customer needs 100 of them and wants to know what type of discount amount he will get to purchase so much. You issue a quote that says something like: 1 gizmo and \$59.99; 100 gizmos at \$50.00 each, TOTAL \$5,000 - add taxes, fees and shipping and come up with a total quote for that amount. The quotes are usually only good for a certain amount of time, such as 10, 30 or 90 days; the quote then expires. Purchase orders. Many companies use purchase orders (POs) to initiate the purchase of products or services from a vendor at a certain price, or as a result of the sale quote they received. POs are moderated in chronological order and used in order regardless of the type of product or service ordered. The list stored by each PO is issued so easy to find as long as you know the po number. Sales orders. After receiving a PO from a customer, you can either send them a product and then bill them for it, or you can give them a sales order (SO) instead. Typically, SOs are issued when the ordered item is out of stock or must be specially ordered, so the actual sale will take place in the future. SOs indicate to the buyer that you have received their order and make a commitment to fill it out. SOs are an agreement between the two parties to buy and sell something at a certain price, but they do not ask for payment. When you send an SO customer as confirmation for their PO at the beginning of the sales process, you agree to fill it at the stated prices. If you don't prepay for the product, you don't bill the customer until the end of the process after the product has been delivered. But you may be wondering about all the different types of invoices you've heard, the difference between pro forma and invoices, and when to send a pre-invoice. Preliminary invoices and pro forma invoices are essentially the same documents documents Names they give your client a head on what the actual account will be when the work is completed. In larger jobs, you can send a pro forma invoice to make sure the customer knows how much work is being done and what the final cost will be after the work is completed. If the work is underway for a significant period of time, you can agree on multiple payments during the process to cover the costs you spend on the project, and send interim invoices for work completed so far. The good news is that you don't need to use all the documentation that is available. Most customers will be annoyed if you sent every type of account you can find. You choose the documents that make the most sense for how your business works. While factoring invoices can be common in some industries, it is not a universal funding solution. It does not address large capital requirements and requires a permanent invoice. It's also active financing, so even if the business doesn't use capital, it still has to pay a fee. The best alternatives to account factoring include invoice financing, term lending, credit lines and business credit cards. Managing as an alternative to invoice factoring Getting funding is not the only solution when invoices are unpaid and your business is short of cash. In fact, it is best to have a short-term financing solution available and combine it with long-term management practices that will help reduce the emergence of cash shortages in the future. Account customers regularly If you bill customers regularly, they can integrate payments into their procedures. It also makes them much less likely to lose an invoice or forget about it before it's too late. There is billing software that can help, but if you're on a budget, adding a simple reminder to your calendar can be just as powerful. Automating invoices and follow-up, introducing automation into your business can help you collect invoices faster. It also ensures that no one will forget to send the invoice and the invoice is definitely delivered. But, beware of the pitfalls with automation, which is that the system can never trust 100% for accuracy, and you may need to maintain and adjust it from time to time. Offering Multiple Payment Options Is simple that I often wonder more business owners don't use. Not every business wants to write a paper check, put it in an envelope, put a stamp on it, send it and then worry about having enough funds in the account. If your business has the opportunity credit card payments, or you can make a direct transfer, for an invoice you are much more likely to receive a payment earlier than if you only offer one option. The best invoices factoring in Alternative Invoices Funding Financing is similar to factoring an account because the loan amounts are based on outstanding receivables. The main difference between the two is that small business owners don't need to assign invoices when financing

invoices, so customer relationships remain under business control. Short-term loans are the most familiar form of financing. They offer small business owners a lump sum of capital with a long maturities and regular weekly or monthly payments. This is a great substitute for account factoring if late bills prevent your business from carrying out such a major project as repairs. Small Business Credit Lines, as factoring invoices, small business credit line offers financing of running costs. Small business owners use both to finance operations and to pay for regular expenses such as wages. However, the small business line of credit offers more flexibility because it can be used when needed rather than all the time. This potentially makes it less expensive for business owners who only need financing once in a while. Business credit card business credit card is a powerful tool for every business. Whether you're making or running a retailer, you have running costs such as gas and supplies. Business credit cards offer you a way to finance these costs without worrying about checking the cleanup in your checking account business. Some of these business credit cards even offer rewards that can add up to significant benefits throughout the year. The bottom line of choosing an alternative to account factoring depends on the type of problem you are trying to solve. Each financial solution is equipped to address a specific financial issue. Choosing the right one is the surest way to minimize costs and maximize the utility you get from funding. The best billing software allows you to optimize the billing process and get paid faster, allowing customers to pay online. We evaluated seven invoice programs based on the ability to create repetitive invoices, send automatic payment reminders, and launch an aging receivable (A/R) report to stay on top of open accounts. Best Invoice Software for Small Business 2020 (Best overall) Professional Invoices and Repetitive PaymentsExpense Management and Easy Tracking RefundsIn Connection Tracking and Payment Collection for Multiple BusinessesIntegration with FastBooks Online or Fast DesktopBuilt-in-CRM needs to track all customers and leadsSales tracking for e-commerce business Answer a few questions below to Personalized Recommendation for Which Billing Software- FreshBooks: Overall the best account software for small businesses based on our research, FreshBooks is a generic package for a business that has a heavy A/R and needs help streamlining billing and collecting fees. When it comes to pricing, it's worth about the same as its its However, FreshBooks does not offer a free plan like Invoicera, zoho invoices, and Invoicely. You can share data with other users, create unlimited invoices, accept online payments and keep track of your expenses. FreshBooks Pricing - Features Automatic Payment Reminders FreshBooks Lite The FreshBooks Lite Plan costs \$15 per month. This allows you to manage time, track costs, accept online payments, run an A/R report, and track projects. However, you can't send automatic payment reminders, charge automatic fees for being late or create repetitive invoices as you can with plus and premium plans. This plan is ideal for self-employed business owners who do not have to track sales by the customer or have more than five customers they have to bill. You can quickly rework this plan because you are limited to billing five customers. FreshBooks Plus In addition to the fact that all the features that are included in the Lite plan, this level (\$25 per month) also comes with the ability to bill 50 customers. Unlike the Lite plan, you can create automatic payment reminders, charge automatic late payment fees for overdue bills, and create repetitive invoices. This plan is ideal if you have heavy billing and could benefit from using tools that would streamline his/R process. For example, Plus allows you to send customers payment reminders before and after billing.ru. FreshBooks Premium The FreshBooks Premium Plan (\$50 per month) offers only one feature that is not included in FreshBooks Plus. With a premium plan, you can issue an account to 500 customers, which is 10 times the number of customers you can issue an account with a Plus plan. This plan is perfect if you have over 50 customers that you need to bill, there is a need to automate your A/R process by sending automatic payment reminders, and charging for past bills. FreshBooks Select FreshBooks Select for users who have over 500 customers. This plan comes with custom prices, and you can also request a demo of this level. Select doesn't offer more features than Premium. Its big advantages are lower payment processing fees, so it's better for high volume customers, and specialized customer support. What FreshBooks is missing while FreshBooks lacks any of the features that we expect from billing software, compared to Viewpost and Invoicera, FreshBooks is missing because it can't manage the bills to be paid (A/P). This means you can't enter bills or pay bills through FreshBooks. However, you can download payment information directly from bank or credit card accounts. User reviews of FreshBooks FreshBooks show that users use automated billing features, such as recurring invoices, and automatic payment reminders that can be sent before and after the invoice is invoiced within the term. However, customers don't like the fact that FreshBooks are unable to manage A/P or reconcile and credit card accounts, like most accounting software systems can. Invoicera: The best billing software with an expense management tool similar to its competitors, Invoicera goes beyond the functionality you expect from billing software to enable a reliable expense management tool at no additional cost. As in the Invoicely and zoho accounts, Invoicera has a free forever billing plan software. If you need to request a refund from a customer or need to keep track of all your expenses, you can do so with Invoicera. Invoicera Pricing - Features of Automatic Invoicera Starter payment reminders Unlike FreshBooks, Invoicera has a free invoice plan for small businesses, Invoicera Starter. This plan is limited to one user, which means you won't be able to share your data with an employee or accountant. In addition, you are limited to three active customers, which means that you can only send invoices to three customers. This plan is ideal for a freelancer or solopreneur who has no more than three active clients she has to bill. It also works best for a company that doesn't track customer sales like a retail store. Invoicera Pro For \$15 a month, you can add an accountant or accountant as a user with Invoicera Pro. You can add extra users to the plan for \$9 per user, per month, versus \$10 per user, per month, with FreshBooks. Each plan offers the same features, including project tracking, time and expense management, and the ability to run an A/R aging report. This plan is ideal for a business that has more than three customers for which it bills and manages payments. Invoicera Business Invoicera Business works \$29 a month. As with the Pro plan, you can add extra users for \$9 per user per month. This plan is priced slightly higher than FreshBooks Plus, but includes up to 1000 customers versus 50 in FreshBooks. You can also manage your unpaid accounts that are not available in FreshBooks. This plan is perfect if you have over 100 customers that you need to bill and manage payments for each month. The Invoicera Infinite Invoicera Infinite is a top-level plan that works at \$149 per month. You can add an unlimited number of users and you are billed to unlimited customers with this plan. Invoicera Infinite includes all the features you'll find in starter, pro and business plans. The Invoicera Infinite plan is best suited for business, which should allow many users to have access to the system. With Infinite, you can give access to unlimited staff. That Invoicera is missing Invoicera lacks anything when it comes to features that one would expect in billing software. If you don't want restrictions on the number of customers and invoices you create, go to FreshBooks Premium. You can create unlimited invoices for up to 500 customers for as little as \$50 per month. Invoicera User Reviews of Invoicera reviews show that users users that they can schedule repetitive invoices, and they can see when the customer has viewed the invoice. However, some customers felt that Invoicera fell short by not providing full accounting functionality compared to accounting software like Fast Books Online. Invoice: The best software for multiple Invoicely businesses allows you to track multiple businesses at an extra cost. As in Invoicera and Viewpost, Invoicely has a free invoice plan for small businesses. Paid plans are about the same as those of competitors. Invoicely is the best billing software for your small business if you need to bill customers for more than one business. Invoice Prices - Features of Automatic Payment Reminders Invoicely Free Plan similar to Invoicera and zoho accounts, Invoicely offers a free invoice plan for small businesses. This plan allows you to create unlimited invoices, manage multiple businesses, and accept online payments using PayPal. If you need to create estimates, track time, manage expenses, or have recurring invoices, you'll need to go to the baseline. The free plan is ideal for freelancers who don't need to give anyone access to their data, have another system to track costs, and who want to bill customers and allow them to pay online. The invoice of the Invoicely Basic Plan is \$9.99 per month, which is less than FreshBooks and Invoicera, which start at \$15 per month for their paid plans. You can give two team members access to your data, create estimates, track time, expense and mileage, track multiple businesses, and accept online payments. This plan is ideal if you need to give other users access to your data, create estimates, and track costs and mileage. The Invoice Professional Plan Invoice Professional Plan is \$19.99 per month, which is less than the FreshBooks Plus plan at \$25 per month. Unlike FreshBooks Plus, which has only one user, Invoicely Professional has up to 10 users. As far as features go, Invoicely is very similar to FreshBooks. This plan is ideal for small businesses looking for an affordable plan that includes up to 10 users at no extra cost. The Enterprise Enterprise invoice plan for Invoicely Enterprise is \$29.99 per month versus \$50 per month for FreshBooks Premium. If you have multiple businesses and many users who need access, Invoicely will be more affordable than most of its competitors. This plan is ideal for the owner who needs to be exposed and track costs for multiple businesses. This is an affordable option if you have more than 10 users who need access to your financial data. Team members will be able to create unlimited invoices and estimates, track costs and mileage, and create repetitive statements. What Invoicely missing Invoicely is nothing short when it comes to the features that you expect to find in Software. However, like FreshBooks, it can't track unpaid bills such as Invoicera and Viewpost. If you use another program to track A/P, then this won't be a problem for you. However, if you want to stay on top of A/P and A/R, you should choose Invoicera. Invoicely User Reviews Invoicely reviews show that users like that they can use the program for free. They also noted that it is very convenient. There weren't many negative online reviews about Invoicely. However, in some reviews, users have noted that they would like to see better customization and integration of options with other programs. Viewpost: The best software for invoices for small businesses that use fast books If you use fast books to manage accounting, you don't have to worry about doing double work when you sign up with Viewpost. Viewpost syncs with both fastBooks Online and fast book desktops, so all invoices and payments appear in both systems without the need for manual data entry. The best part of your A/R balance is always up to date. Viewpost Prices Viewpost charges \$14.99 per month, which is similar to those priced at FreshBooks Lite (\$15 per month) and Invoicera Pro (\$15 per month). However, unlike FreshBooks and Invoicera, which have limits on the number of customers and invoices you can store in the system, Viewpost allows you to send unlimited accounts to an unlimited number of customers. In addition to the monthly subscription fee, payments processed through Viewpost will have associated fees. The fee you charge is based on several factors, such as how you found Viewpost, additional features and features, the type of transactions processed on your behalf, and other factors. Average price breakdown to receive payments in Viewpost: Pricing if you receive payments from another business: Up to 1.5% Prices, if you receive payments from consumers (by payment amount): Up to \$5,000: 2% of total payments \$5001 to \$20,000: \$100 plus 1% \$20001 to \$6000,000: \$25 0.5% \$60001 to \$100,000: \$450 plus 0.25% \$100001: \$550 plus 0.10% Viewpost Features Viewpost includes a variety of features, that go far beyond our criteria for better billing software. Some of the unique features included in Viewpost are A/P, the ability to request an early payment from customers, a dashboard that you can manage all customers' accounts out of, and seamless integration with several different accounting software packages. Unlimited customers and Viewpost accounts allow you to manage an unlimited number of customers and send unlimited bills for free. Unlike Viewpost, Invoicera and FreshBooks also charge a monthly fee for sending invoices. Depending on the level of subscription you subscribe to, you may be limited to the number of invoices and customers you can bill. Viewpost's online payment reception allows you to accept online payments from customers. Customers. Customers can create a free Viewpost account. When you send an invoice to customers, it appears in the Viewpost dashboard. With a few clicks, they can choose and pay their bills. If you pay through an automated clearing center (ACH), it will cost your customers 50 cents. However, if they use a debit card or credit card, you will be billed for trading fees. A/R Aging Report Viewpost has a detailed and consolidated A/R report that will be exported to Excel automatically when it is launched. You can use this report to stay on top of unpaid customer invoices before they become overdue. Automatic payment reminders similar to competitors, you can create automatic messages to remind customers that their payment must be made. These reminders can be configured a few days before the invoice is due to be issued, as well as after the due date has passed. Late Viewpost Planning fee allows you to add overdue fees to overdue customer accounts. You can set up late fees to be a percentage of the total, due to or a fixed amount. Repeated invoices for customers who periodically pay a certain amount can create repetitive invoices in Viewpost that automatically go to your customers on a specific date, such as the first or 15th of each month. Request an early payment If you are tight in cash, you can keep track of those customer invoices that you have created at a discount on early payment terms. From the dashboard, you can select invoices that are eligible for discounts and send a customer a request for pre-early payment. If they accept it, the payment will be transferred electronically to your bank account. Management A/P Unlike FreshBooks, which does not allow you to manage A/P, Viewpost allows you to manage your accounts and payments to vendors at all costs. This process is very similar to the A/R, where the vendor has to create a free Viewpost account. Once the account is set up, they send you invoices via Viewpost, and they will automatically show up on the Viewpost dashboard so you can track them. Integration with accountancy software created in your accounting software can be transferred to Viewpost, and payments received in Viewpost can be transferred to your accounting software, so invoices will be paid for. This ensures that your A/R balance is always up to date. That Viewpost is missing Viewpost includes all the features that you would expect the account software to include, but you should join the Viewpost network by creating an account Some customers may not want to subscribe to a Viewpost account, even if it's free. Secondly, when your customers send you an electronic payment from their bank account, they are charged a 50-cent fee. If you want to go out on a small business invoice that doesn't require customers to join, go with FreshBooks. Your customers will never have to pay a fee to pay their bills online. Viewpost User Reviews We Found Mixed Mixed end, reviews told Viewpost are an excellent invoicing software for small businesses, and customers like that they can use it for free. However, customers who were not impressed with Viewpost said they tried to integrate it with existing accounting software and had nothing but problems and poor customer support. InfoFloPay: The best account software with built-in CRM InfoFloPay has robust customer relationship management (CRM) capabilities that are extremely rare in invoice software. This software allows you to create and track web forms such as contact us and view all the information for the customer like contact information, quotes, invoices and payments in one area. Compared to its competitors, it's a little higher at \$15 per user per month. Best of all, CRM is included in all plans. InfoFloPay Pricing - InfoFloPay Lite InfoFloPay Lite features automatic payment reminders is the most budget plan for \$15 per user per month. The Lite plan allows you to create an unlimited number of invoices and ratings, track an unlimited number of customers on the customer portal, access built-in CRM capabilities, and track costs. InfoFloPay Lite is ideal for a solopreneur that wants to offer its customers a customer portal for managing and paying bills. Because the Lite plan does not include extended reporting or recurring payments, these tasks can be performed in your accounting software and then synchronized with InfoFloPay. InfoFloPay Plus InfoFloPay Plus costs \$20 per user per month. For an additional fee, you can create recurring payments, sell subscriptions, and run customized reports that are not offered in the Lite plan. InfoFloPay Plus is ideal for a business that has many repetitive payments to manage and does not use fast books or other accounting software to run financial reports. InfoFloPay Premium InfoFloPay Premium costs \$25 per user per month. For this added cost, you get access to features such as time logs, project tracking, and the ability to accept installment payments. The premium plan is ideal for small businesses that generate most of their revenue based on the watches on sale. Project tracking and time logs allow you to track the hours worked by employees and contractors for each project you're working on. Once the project is complete, you can transfer the watch to an invoice to bill the customer. InfoFloPay Full InfoFloPay Full is a top-in-line plan. That's a hefty \$30 per user, a month. Using plan you get features that are not usually offered in billing software, such as the form builder tool, digital forms with electronic signature capabilities, and web lead forms. InfoFloPay Full is not for your typical business. However, if you need a system that can help you optimize the interests generated from out or other ways and help with on board new customers, I think you will find the features very useful. That InfoFloPay is missing InfoFloPay does not allow you to send payment reminders automatically to customers before and after the invoice period, and does not include scheduling late fees on past accounts. If these features are important to your business, choose FreshBooks or Invoicera, which include both of these features. InfoFloPay User Reviews In general, customers have good things to say about their experience using InfoFloPay. Summing up the customer feedback we found online, customers like how convenient the software is, the prices available for any business size and the opportunity to try the software for 60 days for free before buying it. Common negative comments about InfoFloPay regarding poor software integration options and support, as well as expensive training, and an outdated user interface. The Invoice: The best software for existing users of the zoho zoho account is part of the zoho product package, which includes zoho CRM, zoho Reports, zoho projects, zoho costs, zoho inventory, and soho Books. The zoho invoice is ideal for a business that currently uses one or more zoho applications. The zoho has a free plan similar to Invoicera, Invoicely and Viewpost. The zoho invoice easily integrates with what you already use, making it easy to share information in apps and avoid double entries. Prices for zoho Invoices - Features Automatic Payment Reminders zoho Account Free zoho Account Free Edition includes all the functions of paid plans like repetitive invoices, automatic payment reminders, and time and expense tracking. The free plan is limited to one user and allows you to bill no more than five customers. The Invoice Free is great for a business that starts and doesn't have many customers and doesn't need to give anyone else access to their data. However, you may find yourself growing out of this plan pretty quickly, which means you will need to switch to a paid plan. The zoho Account Basic zoho Basic Accounts costs \$9 per month. As with the Free plan, it is limited to one user. However, the basic plan allows you to bill up to 50 customers. All of the zoho invoice plans include the same features, such as the ability to create assessments, accept online payments, and track projects. zoho Invoice Basic is ideal for companies that use the zoho apps and want seamless integration in all their systems. The zoho Accounts Standard zoho accounts works \$19 a month. For additional expenses, you get an invoice 10 times more customers than with 500 compared to 50. In addition, the standard of the zoho invoice includes access for three users, which means that you can give the accountant or accountant access to your data. The standard of invoices is ideal for the existing zoho zoho which has heavy billing and needs the ability to provide access to other users. The zoho Account Of Professional zoho Invoice Professional is the highest paid plan priced at \$29 per month. This plan allows you to bill an unlimited number of customers and give access to 10 users. The zoho Invoice Professional is ideal for existing zoho clients, which should give more than three users access to financial data and has more than 500 clients to bill. The zho Professional will save you a ton of time by allowing you to put customer billing and payment on autopilot. What the zo account is missing is a zo account missing nothing when it comes to the basic criteria that we were looking for in choosing the best billing software. However, if you're not using any zoho apps and you don't have plans, this is just a good alternative to FreshBooks, our recommended billing software. zoho Accounts User Reviews of zoho Invoice Reviews believe that users think that time tracking is easy to use, making billing a breeze. The ability to customize different payment options through WePay, Stripe and PayPal also makes it easier for customers to pay online with a zo account. Some of the negative comments about the zoho invoice mention a lack of inventory capabilities, limited integration, and a less user-friendly user-friendly user interface. Envoice: The best invoice software for e-commerce businesses Is if you sell goods or services through e-commerce and you don't need to keep track of open customer accounts, Envoice will work for you. Unfortunately, none of Envoice's plans allow you to run an A/R aging report, send payment reminders, or apply late payments to overdue bills. If you don't have an e-shop, we encourage you to go with FreshBooks. Envoice Pricing and features automatic payment reminders Envoice Essential is the most affordable plan for \$12 per month. It includes unlimited billing of up to 30 customers and you can make bills in any currency and accept online payments from customers. You can also create repetitive invoices. This plan is a good choice for small e-commerce businesses. With the Essential plan, you can make accounts for your customers in any currency, use payment gateways and custom branding, and use excellent support from the Envoice team. Envoice Business Envoice Business is an average plan that runs \$17 a month. In addition to the features included in the main plan, it allows you to add team members, create and have access to application programming interface integration tools (APIs). Although Envoice does not offer an A/R aging report, it allows you to list and manage invoices and includes filtering capabilities to view customer invoices, as well as its status, date and amount. A business plan is a solid choice for an e-commerce business that must store unlimited customer information and use Envoice's API integration. Call to Sell Online Online Selling Online plan is a top-tier plan that runs \$25 a month. It includes all business plan includes plus features specifically designed for online business. This plan allows you to sell through your website, email lists, Facebook, Twitter and other channels. It includes a Buy Now button and an instant checkout for your online store. This plan is ideal for a business that receives payment at the time of sale, as opposed to billing customers and waiting for payment. You can also track sales from multiple channels such as your website, Click Funnel, MailChimp, and Google Ads. With Envoice missing Envoice is missing some of the tools a traditional business may need. However, the tools offered by Envoice are targeted at online sellers, making Envoice an effective and effective solution for e-commerce businesses. Although Envoice does not have traditional reporting features, there are tools to get the information you need at a glance. If you are tech savvy and are not afraid to think out of the box to manage your e-commerce business financial data, Envoice may be for you. Feedback from Envoice Reviews users says users report a love of a user-friendly interface, payment integration, and flexibility. Envoice runs smoothly on several different operating systems. The only negative comments about Envoice were the desire for greater integration of payment gateways. Envoice says it has a lot more integrations in their roadmap for future releases. As we have evaluated the billing programs Many small businesses do not need all the bells and whistles that accounting software offers, such as Fast Books. Instead, they want a software account that can send professional invoices that their customers can pay online easily. The best billing software should be easy to use and include tools to help you get paid faster, such as automatic payment reminders and recurring payments. More Based on the features most important to small business owners, we rated all the software products of the invoice by the following criteria: The ability to create custom invoices: Brand your invoices by adding your logo, colors and other custom projects to create professional-looking accounts available online: Cloud-based software; No software to install, which means you can access it 24/7/365 from any computer with an Internet connection Ability to set up recurring payments: Customers who pay you a set amount for Based - weekly, monthly or quarterly - can be delivered on autopilot, so an invoice by email automatically on the date when you specify Customers can pay bills online: When you send invoices to customers, they can pay their bills online with a debit card or credit card Automatic reminders can be sent to customers: To minimize late payments, you can set up automatic reminders that go to all customers before and after invoices Due to the ability to produce receivables (A/R) aging report: To help you stay on top of outstanding customer balances, you can run the A/R aging report quickly to see what payments are coming from behind or past due to Read Less Bottom Line We have provided you with an in-depth look at the best software invoice products on the market. If you're looking for a convenient, customizable billing software that has all the tools you need to optimize the A/R process, FreshBooks is our best bet. Also, if your small business has credit with BlueVine or Fundbox, integration with FreshBooks makes the process seamless.
