was created using a clean XML style file. 4. XML file and a mouth animation in video form. **\*\*Question\*\***: I would like to create a neat looking talking car mouth animation. **\*\*Answer\*\***: If you have a video recording that has a pretty mouth, you can just place it as the input image for a mouth. But if your video recording does not have a neat looking mouth, or if you just want a custom mouth, then you can do so by following the steps below. 1. The source code of the mouth animation is the difference between the existing mouth animation and the mouth that you want to create. 2. You can achieve this effect by using the Load Method of the Animation Class. 3. To add more than one mouth animation, you can reuse the method LoadMouthAnimation. 4. Use the method to set the position of a mouth in the picture. 5. Use the method to change the alpha channel of a mouth. 6. Use the LoadMouthAnimation method to reuse a mouth animation. 7. Use the loadmouthanimation method and set the images as input images for the lips. 8. Use the lipslipmethod and set the color of the lips as the alpha channel. 9. Use the lipslipmethod and set the alpha of the lips as the alpha channel. 10. Use the lipslipmethod and set the pixels of the lips as the alpha channel. 11.
