The way you are thinking today may be very different from what you did 20 years ago because you have experienced and added too much to your memory. The information you have acquired over the years is not only in your brain but also in your daily activities. You have probably forgotten the specific details of your early years, but you still remember many of the general concepts. Consider the following questions:

- What are the most important things you learned about the world around you in your early years?
- How have your beliefs and values changed since then?
- What new experiences have you had that have influenced your thinking?

These questions may help you reflect on how your thinking has developed over time. Remember that thinking is a lifelong process, and there is always room for improvement. Keep an open mind and be willing to learn new things. You never know what you might discover about yourself.
