

About us

Nengfu Electrical is a company specializing in providing efficient and reliable electrical system solutions and engineering services. We seize opportunities in the development of new power systems and drives digital transformation across the energy sector.

PROJECT BACKGROUND

This project is an international residential smart city initiative invested and developed by Shanghai Zhongjin Construction Group Co., Ltd. in Djibouti, located on the western shore of the Gulf of Aden in East Africa. For this smart city project, our company provides a one-stop service, including complete equipment supply for switching stations, on-site equipment installation and positioning, as well as commissioning and testing services.

NENGFU'S CONTRIBUTIONS

The scope of supply includes 33kV switching station equipment, 10kV switching station equipment, 0.4kV power distribution equipment, and transformers. All high and low voltage switch-gear adopts Schneider's high-end components, and the enclosures are made of reinforced cabinet materials. Throughout the manufacturing process, we maintain meticulous craftsmanship and conduct comprehensive inspection and debugging, ensuring the reliability and stable operation of the equipment at the project site right from the source.
