

## About us

Nengfu Electrical is a company specializing in providing efficient and reliable electrical system solutions and engineering services. We seize opportunities in the development of new power systems and drives digital transformation across the energy sector.

## PROJECT BACKGROUND

Honduras Choluteca Southern Hospital Project, financed with USD 135 million in funding from the Central American Bank for Economic Integration (CABEI), aims to serve 165,000 residents and enhance regional medical infrastructure.

The project is under EPC (Engineering, Procurement, Construction) turnkey delivery by China's Shanghai Foreign Economic & Trade Group (SFECO), covering design, construction, equipment supply, and initial operation & maintenance training.

## NENGFU'S CONTRIBUTIONS

Our company supplied the complete switchgear package, including: 35kV metering cabinet, incoming feeder switchgear, PT cabinet, outgoing feeder switchgear, Sectionalizing bus-tie cabinet, sectionalizing isolator cabinet, Capacitor compensation cabinet, low-voltage distribution cabinets, power distribution cabinets  
Over 100 units in total.

All high & low-voltage switchgear are equipped with premium Schneider Electric components, and the reinforced enclosure structure ensures durability. Through meticulous manufacturing, multi-stage inspection, and rigorous testing, we guarantee reliable and stable on-site performance.

Additionally, we provided two 1000kW diesel generator sets, offering end-to-end supply chain support for the project.
