Tria laser 4x instruction manual

may feel the sensation of a rubber band snapping on the skin. Others will feel a warm, pungent feeling. As the amount of hair decreases, the feeling will also decrease. • In a clinical study, it was found that higher levels were 2-3 times more effective. So for best results, we recommend using the highest setting that you can tolerate. • Treat every 2 weeks for up to 3 months or until you reach the desired result. Clinical studies on file CHECK Your sKin ton Tria Laser 4X is only intended for light to medium skin tones and medium to dark hair. It does not work on white, gray, blond or red hair. If your skin tone matches any of the skin tones marked Not safe for treatment, do NOT use Tria Laser 4X. sKiN ToNe CHaRT Intended skin tones: Not safe: White Ivory Beige Light Medium dark brown brown brown or black for use oN Legs • Arms • Bikini Line • Forearm • Feet • Hands • Chest • Back • Belly • Women's Facial hair (cheek line down) Hair removal laser 4X Quick Start Guide 1 2 3 4 5 6 7 7 8 9 10 10 11 12 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 We are so confident that you will love your new smoother skin, we offer an exclusive 60 day money back guarantee only triabeauty.ca. If you are not satisfied with your results, please send it back for a full refund. To unlock Tria Hair Removal Laser Precision: 1. Unplug Tria Hair Removal Laser Precision from the battery charger. It won't turn work while plugged in. 2. Hold the unit and press the power button to turn it on. The top and bottom indicator lights will turn green, indicating that the device is locked. 3. The skin sensor is at the tip of the device. Place the tip gently against the area you wish to treat to check your skin tone. The skin sensor will automatically detect and control your skin. If it is suitable for your skin tone in the area you want to treat, tria hair removal Laser Precision will emit a series of da da da and the indicator lights will change to Low treatment level if you use for the first time OR the latest treatment level. If the top and bottom indicator lights remain green and you don't hear a series of beeps, then tria hair removal Laser Precision might is suitable for your skin skin in that area. Verify that your skin tone in the area you wish to treat matches the intended tone of the Skin tone + Hair Color Diagram on page 2 of the User Manual. You can also use the skin sensor incorrectly and must try again. To try again, lift the skin sensor from the skin and follow the two previous steps. Make sure the top and bottom indicator lights are lit before placing the tip against the area you want to treat, making sure you do not push the tip into the skin. If you still can't unlock Tria Hair Removal Laser Precision, contact Customer Service at 1-877-321-8742. Note: When the hair removal laser precision is not used for 30 seconds, the device will automatically shut down. Tria Team: Customer Care How to unlock the Tria Hair Removal Laser 4X: 1. Unplug the Tria Hair Removal Laser 4X from the battery charger. 2. Hold the unit and press the power button to turn it on. The viewer will indicate that it is locked. 3. The red light on the bottom of the device is the skin sensor. Keep it in the area you want to treat to check your skin tone. The skin sensor will automatically detect and control your skin. If it is suitable for your skin tone in the area you want to treat, tria hair removal laser 4X will emit a clear tone and the lock indicator in the display window will disappear. If the lock is still visible on the display window and you do not hear a series of beeps, then tria hair removal Laser 4X may not be suitable for your skin tone in that area. Verify that your skin tone in the area you wish to treat matches the intended tone of the Skin tone + Hair Color Diagram on page 2 of the User Manual. You may be using the skin sensor incorrectly and will have to try again. To try again, lift the skin sensor from the skin and follow the two previous steps. If you still can't unlock the Tria Hair Removal Laser 4X, contact Customer Care at 1-877-321-8742. Note: When the Tria Hair Removal Laser 4X is not in use for about 3 minutes, the device automatically switches off. Tria Team: Customer Care Care
