Resource for the transgender community Laura Erickson-Schret (editor) Paperback List Price: 44.95 - Individual store prices can vary. There's no way to be transgender. Transgender and gender nonconforming people have many different ways of understanding their gender identity. Only recently have sex and gender been seen as separate concepts, and we have learned that sex (traditionally considered physical or biological) is as variable as gender (traditionally considered social). While trans people have a lot of common experience, there is tremendous diversity in trans communities. There are an estimated 700,000 transgender people in the U.S. and 15 million worldwide. Even so far, there has been a noticeable lack of organized information for this significant group. Trans Enforcement, Trans Selves is a revolutionary resource for a comprehensive, reader-friendly guide for transgender people, with each chapter written by transgender or genderqueer authors. Inspired by our bodies, we ourselves, a classic and powerful compilation written for both women and Trans bodies, Trans Selves are widely available to the transgender population, providing authoritative information in an inclusive and respectful manner and representing the collective knowledge base of dozens of influential experts. Each chapter takes the reader through an important transgender issue such as race, religion, employment, medical and surgical transitions, mental health topics, attitudes, sexuality, parenthood, art and culture, and more. Anonymous quotes and testimonials from transgender people who have been interviewed about their experiences are woven throughout, adding compelling, personal voices to each page. In this unique way, hundreds of viewpoints from across the community have come together to create this strong and innovative book. It is a hospitable place for transgender and gender-based surveys of people, their partners and families, students, professors, counselors and others to seek information about transgender life.
