If you are looking for a log splitter that you could use at home, which will give you hours easily without problems splitting, then this model is easy to recommend. It has 5 tonnes of hydraulic pressure powered by a silent 2.2 kw induction motor. This distributor may split the logs up to 520 mm (52 cm) in length and not more than 250 mm (25 cm) in diameter. Just insert the log you want to split before the decomposition wedge, press the green button and then press the hydraulic lever, then send the ram forward, pushing the log through the wedge and safely away from the operator. When you release your hold on the lever and the power button ram will automatically return to the start position. There is an optional method 6 to divide the head, when working with soft wood that kindling Dimensions LxWxH: 950 x 270 x 500 mm split power: 5 tones Log distributor Ø-capacity: 5-25 cm Log distributor length: 52 cm Hydraulic liquid cover: 3.5l Working pressure bar: 160 bar Weight approx. 44 kg net 240v Input: 2.2 kW We will try to ship all orders 24 hours after receipt (or the next working day). We suggest that if you need a more accurate delivery date to contact us on 01422 343 081, some of our products are directly from suppliers and we can confirm when they will be delivered. Nb. Unfortunately, we may have to charge an additional fee for offshore deliveries and some Highland deliveries. This will not be shown when adding to the basket, so please phone for the exact cost. Communication is very important for solving problems. We are only a small team, so if for any reason you have any questions or problems with your order the fastest way to solve problems is to contact by phone or email, and we will resolve as quickly as we can. phone - 01422 343 081 e-info@biggersavings.co.uk - No questions or answers have been announced about this item.
