This game is developed for free for Android phones and tablets. At your request, HackDL has decided to prepare the Swipe Brick Breaker game in a tested way and offer it for download. You must have come across many titles like this. Similar titles not only in appearance, design and style of play, but also in terms of naming. Balls Bricks Breaker - Stack Blast and Bricks Breaker Quest are among the games released in this genre that we have already introduced in HackDL. Swipe Brick Breaker game is one of those games that in this article from the HackDL site, we intend to introduce you to dear ones. As mentioned earlier, Brick Breaker was introduced in the style of breaking brick games, which have become indescribably popular in recent years. These types of games are very simple and fun and are one of the funniest small and clean games to spend your free time. Swipe Brick Breaker is the same as the games and the set is the same. The only important thing that can be said about this game is that this title used a lot of simplicity in the design section. All the designs in this game are flat and minimalist. This attitude in the design type makes Swipe Brick Breaker feel more classic than other similar games. Slide Brick Breaker Mod Apk, you have to shoot several bullets at the bricks in front of you. Each brick has a number on it that indicates the health value of this brick. Each ball hits these bricks, reducing the number by one. When these numbers reach zero, the desired brick disappears. In the same way, you must have so many balls that they disappear when you shoot these bricks. But it's not that simple. There is a very important point in this game and that is correct and calculated targeting. Just be more discriminating with the help you to others. After hitting the bricks, the balls are thrown to the other side (depending on your targeting) and have the ability to hit other bricks as well. Professional players score the best points by catching balls between several bricks. Bricks: your balls run out every time you shoot, the bricks come down one step. When these bricks reach a low level, you will be a loser. In this sense, it is safe to say that Swipe Brick Breaker is a record game. You can download this small and beautiful game right now from HackDL fast servers and create an interesting hobby for yourself, or even compete with your friends for better records. Swipe Brick Breaker Mod Apk has over 10.5 million downloads and a score of 4.6 out of 5.0. Note: modded version Coming Soon for this game. Swipe Brick Breaker Mod Changes to v1.4.27: Bug Fixes. It's hard to explain, but once you advance to levels 20 and the line of balls bounce everywhere, it's very relaxing. I like that it's a game that has no pressure (there's a pause button that's big) and can be picked up and played for even the shortest little break of your day. Swipe the brick breaker computer.
