FileCloud is free to use, and comes with an easy to install desktop client. Ubuntu bug 1887949 in gnome-disk-utility (Ubuntu) "gnome-disk-utility use up lot of disk space" [Undecided,New] Odd\_Bloke: I just came across that bug.. Doow: I haven't looked into it yet. :p Odd\_Bloke: Is there any hint in the source code what it does with the old (precise) data? Odd\_Bloke: i.e. does it simply erase the old content or does it preserve some of it (or even all of it)? elias\_a: I don't know, but I'd expect the latter, as we have plenty of space. Odd\_Bloke: OK. So it is a temp measure, not a permanent change. Odd\_Bloke: For anyone that is interested: in case of emergency one could always use Odd\_Bloke: clonezilla would be great, as it can make a copy on an external disk or partition. Odd\_Bloke: And clones can be later imported by to be restored to the primary disk. Odd\_Bloke: I would assume it is somewhat more complicated for Ubuntu, but there are plenty of guides on the web for doing this. elias\_a: There are a couple of issues, firstly: it is fairly difficult to restore multiple disk images from an old version of Ubuntu.

---

Secondly, that version is dead; that particular version of the package no longer exists. Odd\_Bloke: This is true. However, it does not seem that way to me if one has read the bug report. Odd\_Bloke: The bug report states that the whole disk space is currently used up and that it is therefore impossible to restore all data. Odd\_Bloke: And that it is the intention of the developers to
