He said:.I got the products that you are talking about, but I must be honest to you. I've just put it in and it's like "what am I missing, what do I not see?" They have some programs that you can try, like Antivirus, but I don't know how much that will help you. I hope that is helpful to you, but I must be honest to you. 1MB. I also tried windows 7 activator black edition 2009 r1.rar upgrade disk... but still not working,so I thought the problem is disk burn, not upgrade. 1MB. How can I solve it? Windows 7 activator black edition 2009 r1.rar DVD DVD Burner How do I install Windows 7 activator black edition 2009 r1.rar to a DVD (or other disk)? Hi there!.com was a little uneasy about this, and I almost dinged you. If you follow the steps, I think you'll be okay. A friend told me about some "hot" DVDs that are available on the Internet, and I think this one is one of them. I looked for this DVD on the Internet, and the.com site was the only place I could find it. I'm not entirely sure that they have some other DVDs that you can also use for this upgrade; that's why I chose this one. (I think I saw one somewhere else, too, but I can't remember where.) Anyway, I'd like to show you what I did, so maybe you can use my approach for your own DVD. First, I inserted the.rar file into my computer and extracted the contents. Then, I put the contents on a DVD using Windows DVD Maker. I chose DVD Video, but you can use your own format if you want. Then, I chose an MP3 file, and I chose the file from the.rar as the main song on the DVD. This is the only CD you'll need in addition to the DVD. Now, it's time to burn the DVD. First, I made sure I was using the DVD/CD that came with Windows 7. Then, I chose where I wanted the DVD to be burned. I chose the "New" option, and I chose the option 520fdb1ae7
