

WHY CHOOSE GASTRO DETECT?

Perfect adherence to current biopsy guidelines will still sample only **5% to 10%** of the BE surface mucosa, particularly in longer segments
Iyer PG. *Gastrointest Endosc.* 2019.

Improved Sampling

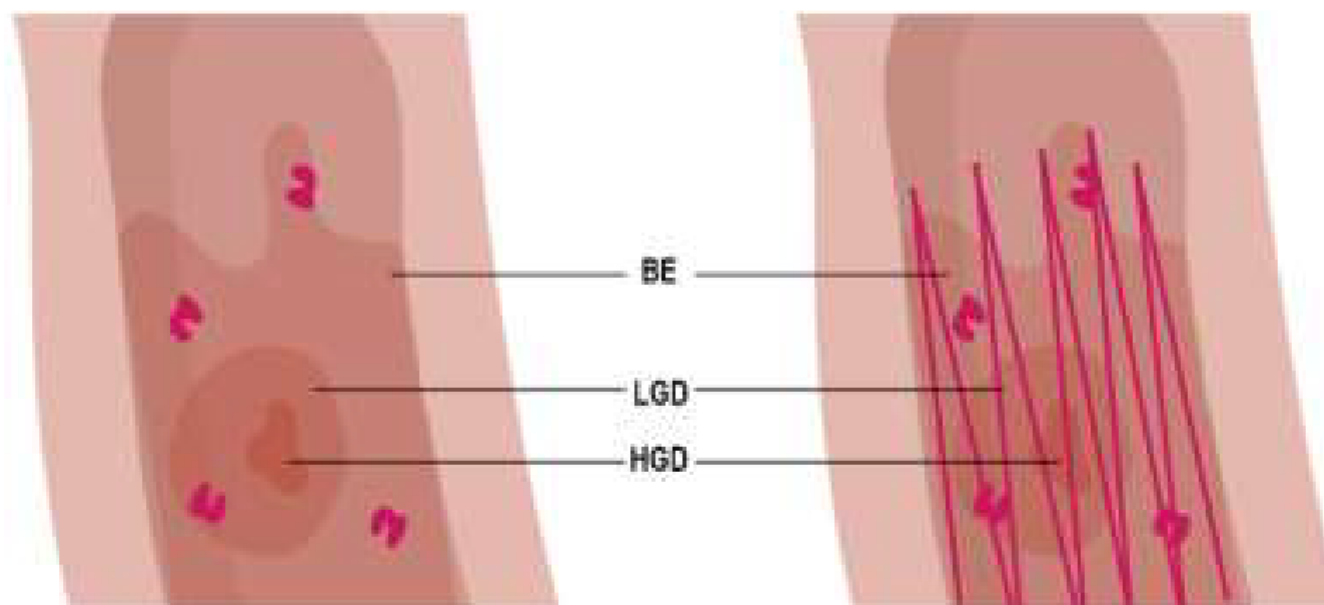

Advanced Diagnostic Accuracy

Closing the gap Between Detection and Diagnosis

Forceps Biopsies

Sampling a smaller surface area increases the risk of missed detection

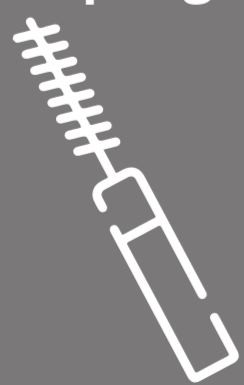

Gastro Detect + Forceps Biopsies

Enables physicians to sample a larger area more effectively, improving diagnostic accuracy

How does Gastro Detect Work?

Enhanced Sampling

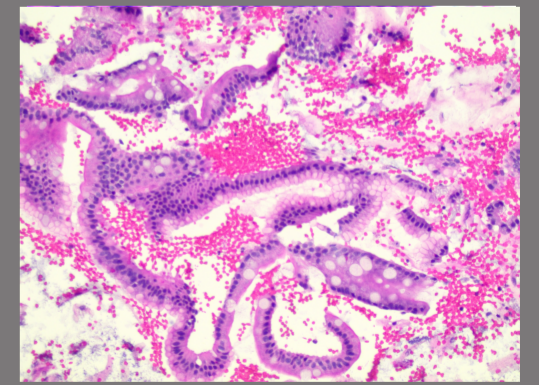

Brush captures a larger surface area during biopsy

Expert Pathology Review

All samples are analyzed by APS Fellowship-Trained GI pathologists, experts in detecting Barrett's esophagus and dysplasia

Improved Detection

Increased detection of Barrett's with a definitive diagnosis

Boost Detection, Improve Outcomes.

When used alongside forceps biopsies, Gastro Detect significantly improves detection rates and provides a more definitive diagnosis.
