The best-selling authors Are David Myers and Nathan DeWall's brief introduction to psychology speaks to all students, regardless of their background or level of readiness, without any assumptions made in the dictionary, examples, or presentation. Students of all kinds are satisfied with an inclusive tone and managed, pedagogical-efficient chapters. Teachers value sponsored by encouraging students throughout THINK critically, CONSIDER different perspectives, and improve their daily lives. Psychology in everyday life is a complete and accessible resource for students of all levels. Dave Myers and Nathan DeWall work on the text and relevant Content of LaunchPad so there is a strong link between all aspects of the course. This edition is largely updated to reflect the latter in psychological science and further emphasize the value of thinking critically, given the different perspectives and improvements of our daily lives. The following elements support this new theme in the fifth edition: THINK CRITICALLY: The new section of Psychological Science in Post-Truth World in Chapter 1, with its new companion animated tutorial in LaunchPad. Infographic Thinking Critically About with new related events in LaunchPad. CONSIDER DIVERSE PERSPECTIVES: New coverage on topics related to diversity and inclusion, especially the much-revised Chapter 4, sex, gender and sexuality. A new historical chronology in Annex F, with a focus on different voices. New classrooms on diversity-related topics are now included in the instructor's resources. IMPROVE YOUR EVERYDAY LIFE New Student Preface, How to apply psychology to live your best life, focused on student success. The new Improve Your Daily Life feature in each chapter helps students apply the principles of psychology in their own lives. Evaluate your strengths in LaunchPad to help make the concept of psychology meaningful, memorable and useful for students. More Look Inside The Bestselling Authors By David Myers and Nathan DeWall's brief introduction to psychology speaks to all students, regardless of their background or level of readiness, without any assumptions made in the dictionary, examples, or presentation. Students of all kinds are comfortable with an inclusive tone and manageable, Chapter. Chapter. Appreciate authors encouraging students throughout THINK critically, CONSIDER different perspectives, and improve their daily lives. Psychology in everyday life is a complete and accessible resource for students of all levels. Dave Myers and Nathan DeWall work on the text and relevant Content of LaunchPad so there is a strong link between all aspects of the course. This edition is largely updated to reflect the latter in psychological science and further emphasize the value of thinking critically, given the different perspectives and improvements of our daily lives. CONSIDER DIVERSE PERSPECTIVES: New coverage on topics related to diversity and inclusion, especially the much-revised Chapter 4, sex, gender and sexuality. A new historical chronology in Annex F, with a focus on different voices. New classrooms on diversity-related topics are now included in the instructor's resources. IMPROVE YOUR EVERYDAY LIFE New Student Preface, How to apply psychology to live your best life, focused on student success. The new Improve Your Daily Life feature in each chapter helps students apply the principles of psychology in their own lives. Evaluate your strengths in LaunchPad to help make the concept of psychology meaningful, memorable and useful for students. The trusted author of the Psychology in Everyday Life team offers quality writing and resources that teachers and students can rely on. This quality extends to supplements and media that are sponsored by the initiative and integrated with the tutorial. Both David Myers and Nathan DeWall bring their teaching and research experience to every page of text as well as to the activities of LaunchPad. An affordable, complete overview of introductory psychology While the shortest of Myers/DeWall texts, and one of Macmillan's most accessible solutions. Psychology in Everyday Life offers a complete, college-level survey area. As they write, Dave Myers and Nathan DeWall keep asking themselves: Will an educated person need to know this? Will this help students live better? In addition, the reliable and integrated resources of the instructor and student at LaunchPad provide a complete training and learning program to succeed in this course. Evaluate your strengths These launchpad activities allow students to apply what they learn from text in their own lives and experiences by looking at key strengths. Each action begins with a personalized video introduction from the authors, connecting force with the contents of the chapter. Next, students students self-strength (critical thinking, sleep quality, self-control, strength of relationships, belonging, hope, and more) using weights developed by researchers through psychological science. After showing students their results, the authors offer students tips on nurturing that strength in their own lives, followed by quizzes to help strengthen learning (and make activity appropriate/evaluation). Effective training of Myers and DeWall in pedagogy follows best practice of memory learning and research. Their text training system, as well as in LaunchPad (including the Adaptive LearningCurve survey), uses a testing effect that documents the benefits of actively obtaining information through regular testing with immediate feedback. New to this edition is a new student foreword, how to apply psychology to live your best life Myers and DeWall's new student foreword has a broader focus on student success. Dave and Nathan were motivated to create this useful resource after hearing from many instructors about the challenges of meeting students where they are, and the struggle that many students have made adjustments to college courses. They know that helping students early on - especially in foundation courses such as this one - will give them a better chance of completing the course and eventually their degree. Dave and Nathan have also heard directly from students who want to apply the findings of psychology in their own lives in an attempt to achieve self-improvement and better adaptation of life. The authors cover the following topics: self-service and self-improvement, time management and research tips, social life, and finding meaning and pursuing goals. The new integrated theme is THINK Critical, CONSIDER diverse perspectives, and IMPROVE your daily life. Outlined in Chapter 1, this topic asks students 1) THINK: Think critically by studying sources and evidence before accepting arguments and conclusions. 2) CONSIDER: Consider other voices and ideas by being open to different points of view. By interacting with people who are different from you, your world will be enriched. 3) IMPROVE: Use evidence-based psychological principles - on relationships, success, stress management, making sense and more - to improve your daily life. New Improve Your Daily Life and Into Your Daily Life Matters. These questions and applications, integrated into each chapter, are based on the previous feature of the publication. Now they are more effective at helping students relate material to their own lives, and to apply the principles of psychology to better adaptation and self-improvement. When students make material meaningful, it also becomes more enjoyable and memorable. New Video Walk Through Ch. 1. This Round Of Chapter 1 students as text pedagogy can help them successfully learn the content of the course as well as how to text the text the media are working together. With more than 900 new study citations (dated 2015 - 2019) like any Myers/DeWall revision, this edition benefits from extensive reading by authors and communication with colleagues and students to include the most relevant new findings available, in a way that reaches all students. For a quick summary of the changes chapter by chapter, visit here. Heavily revised Chapter 4, gender, gender and sexuality. A lot has changed in the field of psychology since it was written in the last edition, especially in this rapidly changing sub-field. The authors requested additional reviews from experts and trainers and made extensive updates to this coverage. The authors have worked to be appropriately comprehensive and fully relevant in presentations, representing an abundance of ongoing research in this area, but also embracing the experiences of many people who may not be well represented in literature. New History of Psychology: Timeline. This new app offers a timeline that includes many different contributions to the history of psychology. Infographic Thinking Critically About This visual tool engages students in critical thinking about key psychological concepts (parenting styles, gender biases, sexual aggression, how to be persuasive, therapeutic lifestyle changes and more). Now accompanied by a new Thinking critically about the infographic in LaunchPad. New diversity-oriented active training activities in the instructor's resources. New classroom exercises, student projects, demonstrations and lecture/discussion topics focus on diversity in psychology and work well for clarifying or reinforcing concepts. Achievement Read and Practice marries Macmillan Learning Mobile Available e-Books with the famous LearningCurve adaptive quiz. It is an easy-to-use and affordable but exceptionally powerful learning and learning option that simplifies the process of increasing student engagement and understanding. Teachers can assign reading simply, students can complete assignments on any device, and the cost is much less than that of a printed book. David L. Roby, Texas Southmost College Authors have done an excellent job of linking what this text has learned in this text for the daily lives of students. Anita. There, Greenville Technical College Authors have done a fantastic job in linking concepts to real-life examples throughout the text. Even the photos/graphics reflect real apps that are interesting and interesting. The graphics and illustrations are clear and appealing, especially those that highlight real life applications. Infographics, tables and graphs are useful for clarifying the specific concepts covered. John Mandracchia, Missouri West university I really like the style in which it is written -- seems more accessible to the wider wide students who will take an intro-level psychology course. Angela B. Dortch, Ivy Tech Community College Cross-Cultural Facts, research seems to be significantly, boldly woven into the chapter - pretty impressive. The ingenuity shown in the infographic cannot be underestimated. Illustrations, captions, photos help students connect to everyday experiences, everyday realities. This illustration today surpasses other textbooks. Psychological concepts plus definitions, presented in the text box with color illumination, emphasize the location and connection with specific sections of the chapter. The color schemes used in the drawings makes the information come to life. Critical thinking about infographics helps students use applied learning. It's one thing to remember the definition of humanistic accessibility, but the infographic hones, asks students to think about information often stuck in our memory. Honestly, photos and captions encourage the reader to learn more, even encourages students to read to learn more. Research and examples are combined in many ways with current events, everyday psychology. Compared to the chapter in my current text, Chapter Eight's choice of research, a variety of photographs, infographics, illustrations, far exceed the current text. Caring, caring, incorporating such diverse features into a chapter makes it easily usable internationally, globally. The narrative is also colloquial and readable. (I've always appreciated Myers' writing style.) In general, the organization flows well. Martin Lance, Forsyth Technical Community College and ECPI College Depth are still clear writing this text superior to my current tutorial, and I think it would be more appealing to students and more interesting to teach from me. Very well organized by information and visual appeal. I like thoughtful questions all over the text. Kelly McCants-Price, Ann Arundel Community College Authors have done a great job of doing topics in the chapter relevant to everyday life... This is certainly better than what is provided in the Open Stax text. The illustrations in the chapter are great! Overall, I believe this is one of the best sexual and gender chapters I've read in the introductory psychology textbook. The organization is great! I believe that my students will enjoy the chapter. Thelisa E. Nutt, Tarrant County College I believe students get their money's worth with this tutorial. I say that because of the content of the chapter and the appearance of the tutorial. It reads very smoothly. I love how while reading the chapters the little pieces of authors were included. Dunn Hazel, Polk State College Just this year, I started assigning videos on LaunchPad as additions to the chapter. I often hear praise about the video. Todd J. Smith, Morehead State University Every time an institution asked me to move on to another book, I inevitably went back to this one. Students are engaged in this book. It has the ease of reading without sacrificing the content. It has good lighting classics with a good inclusion of modern science. Jessica Fedde, Johnson and the University of Wail Therapy chapter a well-written chapter. I believe you have got into the main topics that should be included in the introductory psychology tutorial on therapy. You include all the basic theorists along with the various bio-medical methods currently used. The chapter is easy to read and for students to understand. Students report that they like subtitles and practical questions. Andrea Brown, College of Southern Nevada I am impressed and pleased with the applications to everyday life included in the chapter. I absolutely love the tutorial! I have received positive feedback from my students and have noticed improvements in grades since taking psychology into everyday life 3 years ago. The text works well in my courses because students do not find reading intimidating and therefore some are more motivated to complete the assigned readings. Study assistants (such as chapter tests, get and remember) are included in each chapter to help students with chapter quizzes and exams. Carol Wilkinson, Whatcom Community College This book is economical, current, interesting and easy to reduce the size for a quarter system. For 20 years, I appreciated Myers (and now DeWall as well) rooming out on how to write an intro book. I like how the measurement sections are so I can have students easily understand which sections to read or miss. Douglas Dinero, Onondaga Community College Is pleased to see that much of the research cited relatively recently over the past 5-10 years. I also like how the quotes are a little smaller than the rest of the text, so they're not too distracting for those who aren't used to reading text with frequent quotes. Neurobiological material can be difficult and boring for beginners in psychology, but it is presented in a way that is interesting and relatable. I've always liked David Myers' writing style since I took my first psychology lesson almost 20 years ago. I find it very readable and relatable. This abbreviated text works well with my community college students in that it presents a lot of material in a digestible way without sacrificing any of the intellectual rigor of a more comprehensive version. I also like how this book seeks to relate the material to the situations that the reader experiences in his life. For many of my students, this is the only impact of the psychology they will get, so it helps to make it as relatable as possible. Look inside psychology in Life Fifth Edition 2020 2020 Mr. Myers; C.
