Download guests can't request updates! Hitman Sniper – quality shot on Android with a famous game character in the lead role. This time the secret agent must be in the role of a killer, and use a sniper rifle to destroy enemies. The action takes place in the territory of Montenegro, where every day the protagonist receives new orders. Playing is easy, just take the order and then the player throws at the desired location. The victim is marked with a red target over my head on this with search problems should arise. Tap on the screen, turn on pointing mode. Each task is definitely given the time after which the character is evacuated from the scene and given a decent amount of money as a reward. Only Hitman Sniper around 150 missions and around 10 sniper rifles, but in the future, possible extensions and bonus stages. The game is recommended to fans of camera shooters, where precision, patience and perseverance skills should be applied. SQUARE ENIX LTD Android 4.1 + Version: 1.7.193827 \$0 Hitman Sniper (MOD, Unlimited Money) – in this game the SQUARE ENIX developers offer you to become a killer. Place many different orders, which will largely be to address important and highly dangerous goals. Doing your job is of very high quality, and always staying in the shade and unnoticed. Earn money for accomplishing tasks and spend them on special equipment and weapons, which is much easier for you to accomplish a particular mission. Before each job carefully choose your weapons, and think about all your actions. Occupying a privileged position for you and removing the target. Updated to version 1.7.193827! Hitman Sniper is a first-person FPS shooter. But it doesn't allow you to compare it to shooting games on mobile platforms that are mainly rude games for FPS games, mainly because it gives you a lot of empathy. Speaking of FPS game in the sense of replacement, first I think it's indeed the host platform FPS king - Call of Duty series: breathing in the game when play, shooting injury hurt when contraction, red and a variety of real ambient sound for later development of mobile games has brought a lot of inspiration: before modern warfare After this hitman sniper. In Hitman Sniper, we are usually located on the hill in front of the place where the target was killed. When you click on the screen to open the scope, you have to face proof of many factors - the confrontation of brightly lit buildings is filled with a large number of bodyguards, civilians and secondary targets other than the primary target of murder, no matter who you are, the people around them react differently: civilians the nearest bodyguard for help - letting you make decisions - if you kill too many civilians will cause the mission to fail and kill this bodyguard will increase your chances of exposure, as shots fired corpses will not only lead to other bodyguards, the civilian will then seek help from others; Direct bodyguards must also take considerable risk, if you can't be beaten and killed by bodyguards , immediately look for the bunker and call to notify everyone that the player's primary goal to kill is to flee and the player's only chance is to kill them before lifting the handset to answer the call. The game's characterization of the whole process can be described as a perfect sound, sometimes quiet to hear your own breath and shells fell to the ground sound, sometimes noisy burst into oil drums, civilians fled around crying for help, the bodyguard room The voices of radio interlocutors, the shots that ripped the air out from time to time , and the cool female commander who kept instructing every step of the way were heard. These voices come and go, so the murder of a degree of relaxation, as if the player is the legendary killer 47, but in front of it all is just a game that holds the game of chess. This replacement is improved to the maximum at the time of a bullet: Unlike traditional sniper games, the interchange operation on Hitman Sniper must be done with the proper blow operation, which can be costly if the operation is wrong For a long time, note that this delay in some tasks can be fatal. So if you want to get a higher rating on your game, you still have to carefully plan your murder: when the bodyguard is standing by the pool and killing him, he can leave the body directly in the pool without being detected by other bodyguards; Too much surveillance disrupts your actions by shooting other accessories on the scene or by other characters that can cause distractions to distract you; you can even find and destroy feeding equipment to hide the traces you have left in a room. At the same time, as a first-person shooter , Hitman Sniper also has certain requirements for player operation. Players in the open mirror aiming can be shot in two states - under normal forward swing views, the face of the moving target when the prediction is too difficult; Rest status can stabilize the view, although limited time, but it can give players a certain amount of time to think and predict. Sniper who is the most loyal partner? That's how it is, this sniper gun. Benefit from a powerful weapon system and complex mission requirements. Players can the new weapons by killing the secondary targets that are hidden in the level, ing a completely new sniper gun after collecting all the materials. The design of the mission is also very creative, and sometimes we may have to play ideas such as Hitman Go and observe how to solve the problem. Unlike other sniper games, individual tasks and simple scenes make the game boring and boring. Sniper takes the difficulty of the task and the complexity of the scene to a new level, and we must continue learning to progress progress high scores. Each section of the game will have a number of separate tasks, these tasks are performed in the same scene, but different objectives, different mission requirements. For example, you are required to use the objects around the target to dispose of the corpse at the time of the murder. For example, after the target goes to the pool, the target will fall into the pool for the purpose of handling the corpse. For example, you are required to trigger a car alarm led to the bodyguard killing him like this. These tweaks make the game changeable, very interesting. In addition, the freedom of the game is very high, you can kill other high value targets to earn remuneration while completing the task, access to new weapons and accessories. The game you have to pay attention to at the time of the shooting, because a shot, will provoke a series of chain reactions, sideways people will scream for attention, bodyguards will check the body to inform the partner, and high-value targets will quickly evacuate the scene. It is possible that one did not pay attention, before the effort is wasted.- ApkAwarD.coM As a killer game, One of the sniper weapons is the protagonist of nature, Hitman: Sniper firearms are real, and different weapons have different characteristics, but it also has different functions, you can use these features to complete different mission, when you spend tens of minutes on a mission that has to test other weapons, it is possible a small feature is the key to determining the success or failure of the mission. Overall, Hitman Sniper is a very powerful and very playable first-person shooter who continues the consistent quality of SE's Hitman line and deserves each player. Info App 5.5 – Now that it's here, I can't stop playing, which is notable for a title that is much more concerned with showing how much can be done within certain restrictions rather than revealed in any kind of excess. - GamezobEBECOME The latest SILENT KILLERStep in the shoes of Agent 47 in Hitman Sniper and discover the most compelling sniper experience on mobile.
