Frank E. Musiek, Ph.D., CCC-A, is a professor and director of the Laboratory of Neuroaudiology, Department of Speech Language and Hearing Sciences at the University of Arizona. He is an emeritus professor at the University of Connecticut and a former professor and director of audiology at Dartmouth Hitchcock Medical Center. Jennifer B. Shinn, PhD, CCC-A, FAAA certified in audiology through the American Speech Language Association and the American Academy of Audiology. She currently has an appointment as an assistant professor at the University of Kentucky in the Department of Otolaryngology, Department of Surgery. She is also the Chief of Audiology and Director of Resident Research. She has extensive experience in various fields of audiology, including advanced diagnostics and neuroaudiology, with a particular focus on diagnosing auditory disorders and subsequent (re)habilitation. She has published both peer-reviewed articles and book chapters in the above areas. Her presentational track record in these areas includes state, national and international levels. Jane A. Baran, Ph.D., Professor Emerite at the Department of Communication Disorders at the University of Massachusetts Amherst. Her core research and clinical interests are in the area of (central) auditory processing disorders, auditory-induced potentials, as well as neuroanatomy and neurophysiology of the auditory system. She is the co-author of three books, Neuroaudiology: Case Studies, Hearing System: Anatomy, Physiology and Clinical Correlations, and Auditory Disorders. In addition, she is the author or co-author of a number of journal articles and book chapters in normal and disordered auditory processing, language processing, auditory-in-strength potentials, and auditory neuroanatomy and neurophysiology. It has presented numerous scientific papers and training seminars at regional, national and international meetings. Dr. Baran is a member of the American Association of Speech language and hearing (ASHA), winner of the 2001 Clinical Teachers Award of the American Academy of Audiology, winner of the ASHA Special Contribution To Higher Education Award in 2013 and winner of the 2013 American Academy of Audiology Award. She is also one of the select groups of scholars to receive the Carnegie National Fellow's Fellowship Award from the Carnegie Endowment for the Advancement of Teaching and Learning. Raleigh O. Jones, MD is an associate professor of surgery and chief of otolaryngology for head and neck surgery at the University of Kentucky Medical Center. He is a graduate of the University of Kentucky College of Medicine and an otolaryngology residency program at the University of North Carolina at Chapel Hill Hospitals. He received a fellowship in neurotology from the Foundation for Ear Research specializes in medical and surgical treatment of patients with hearing and balance impairments. He is the author of more than 30 articles and 8 chapters of the book and has been awarded several teaching awards. © 1996-2020, Amazon.com, Inc. o afiliados. Todos los derechos reserves. For immediate release (San Diego, CA - July 23, 2020) - The second edition of Hearing System Disorders reflects the joint efforts of renowned audiologists and otologists to provide the reader with both the audiological and medical aspects of auditory dysfunction associated with peripheral and central auditory system disorders. This book includes numerous in-depth case studies covering both classical and unique clinical presentations that will provide informative reading for students and professionals in audiology, otology and neuroscience. The book also includes color images of video otoscopy. New to the second EditionCoverage additional auditory disorders, including meningitis, cytomegalovirus, increased vestibular aqueduct syndrome, and barotraumaNew case studiesPrepared links and resourcesAcces to the website of the companion PluralPlus for instructors, which includes PowerPoint lecture slides and color images from textBook DetailsTitle: Auditory Disorders, Second Edition Authors: Frank E.
