

CURACO | Carebidet

Intelligent Automated In-Bed Toileting Care

When ALS Makes Toileting Care Harder, Technology Can Help.

NO-TRANSFER. AUTOMATED. IN-BED.

As ALS progresses, declining strength and mobility can make transfers, hygiene, and nighttime toileting increasingly difficult. Carebidet allows bowel and bladder care to occur while the individual remains comfortably in bed.

NO TRANSFER

Remain lying comfortably in bed—reducing the need for bathroom transfers.

AUTOMATIC CLEANSING

Detects and removes waste, then washes automatically to help support hygiene and skin care.

WARM-AIR DRYING

Helps leave the user clean, dry, and more comfortable.

CAREGIVER SUPPORT

Reduces repetitive lifting, repositioning, and hands-on cleanup.

Supporting Dignity as ALS Care Changes

Carebidet automates many of the physical tasks associated with toileting while helping preserve privacy, cleanliness, comfort, and dignity—at home, in hospice, or in professional care environments.

curaco

Global Manufacturer, South Korea

“ Using the Carebidet improved hygiene and cleanliness, and reduced the burden of nursing care. ”

— Hanyang University Hospital ALS Clinic

Less Moving. Less Handling. More Dignity.

CURACO | Carebidet

Intelligent Automated In-Bed Toileting Care

The Technology Behind Carebidet.

Developed by Curaco to support cleaner, more dignified in-bed toileting care for people with advanced mobility limitations.

Advanced Automated Excretion Care

Intelligent sensing and precision cleansing work together to deliver safe, effective in-bed care.

110+ Global IPRs

Protection for core technologies and innovations in excretion care worldwide.

International Recognition

Trusted by healthcare professionals and care organizations around the world.

Designed for Limited Mobility Care

Built specifically for individuals who require care while remaining in bed.

How Carebidet Works

1

Detects

Sensors detect waste.

2

Removes

Waste is gently removed.

3

Washes

Cleanses with warm water.

4

Dries

Dries with warm air.

Why This Matters for ALS Families & Caregivers

No transfer to the bathroom for toileting care

Less lifting, repositioning, and nighttime disruption for easier overnight toileting care.

Automates detection, waste removal, washing, and drying

Supports dignity, cleanliness, comfort, and peace of mind
