OASA NEWSLETTER

UPCOMING EVENTS

Mission Moonshot Masterclass
- Starts 31st July 2021

We are launching a business and leadership accelerator program helping companies to address the chaotic challenges such as COVID-19, the Digital Economy, and next, the Space Economy, by leveraging on their own young talents and by putting them through a series of customer discoveries.

"BEST" Program
- Starts September

We collaborate with the HKU Academy for the Talented and the HKU Laboratory for Space Research for the first Space Technology Initiative in Hong Kong for secondary students, the Business Economy for Space Technology (BEST) Program. "BEST" is a guided, STEM-based, hands-on, and immersive, interdisciplinary educational experience with a strong entrepreneurial edge. It will allow students to unfold the unlimited boundaries of the NewSpace economy and explore how a CubeSat may unravel solutions to global issues.

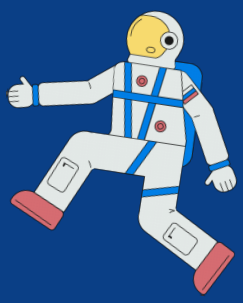
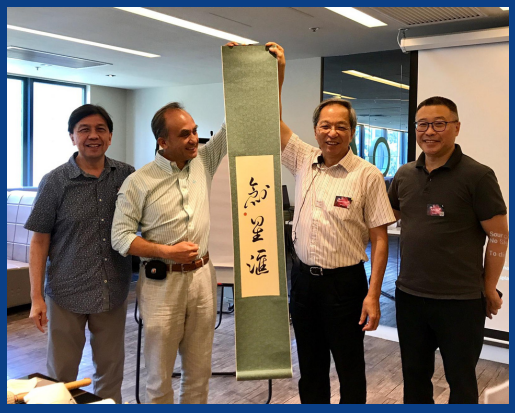
WHAT HAPPENED



OASA helping to power City U's New Venture Creation Platform - Starts 29th July 2021

New Venture Creation Platform (NVC Platform) is a precursor to training under HK Tech 300, where innovative ideas are nurtured. HK Tech 300 is CityU's flagship innovation and entrepreneurship program to launch start-ups. From idea generation, collaboration, learning and sharing to team formation, evolving ideas into potential value proposition through the Sandbox as a new tech venture. OASA invited students of the NVC program to join OASA in 2021-2022 for free. As a student member, they can participate in OASA's Young Marco Polo program and participate in new corporate challenges.

First OASA offsite- 10th July 2021



Chinese calligraphy presentation of OASA's name

We held our first offsite event at the CUHK School of Hotel and Tourism Management, one of our partners. We spent the day productively by brainstorming on OASA's potential business model, membership program structures, and membership acquisition strategy. Along with that, our members of the board, staff and members took the chance to network with each other and held meaningful discussions on various topics regarding the future Space Economy!

Team-building workshops
