Website design and build by Novel MASTER COMBAT MEDICINE FULL-SIZE FORMAT - \*\*biggest edition available anywhere\*\*: giant 8.5" x 11" size means large, clear print and pictures. Complete & unabridged "Batteries last hours, books last decades. Get the print edition!" The 75th Ranger Regiment Trauma Management Team (Tactical) are the most revered combat medics in the U.S. Army. The Ranger Medic Handbook contains the distilled wisdom of hard-won experience over decades in combat around the world, in depth and detail, including dozens of easy-to-follow diagnostic and procedural flow charts that will let you correctly and effectively respond to a huge variety of medical situations, both life-threatening emergencies and every-day discomforts. RANGER MEDIC CHARTER"SOCM ATP" (Special Operations Combat Medic Advanced Tactical Practitioner) Shoot and engage targets to defend casualties and self. Operate relatively independently with highly-dispersed highly-mobile combat formations in an austere environment.Communicate via secure and non-secure means. Move tactically through unsecured areas. Absolute master of the basics through pre-hospital trauma management within scope of practice. Practitioner who assists licensed medical providers with medical emergencies and routine care encountered while in garrison, training, and during deployments. FOREWORD Historically in warfare, the majority of all combat deaths have occurred prior to a casualty ever receiving advanced trauma management. The execution of the Ranger mission profile in the Global War on Terrorism and our legacy tasks undoubtedly will increase the number of lethal wounds. Ranger leaders can significantly reduce the number of Rangers who die of wounding. Survivability of the traumatized Ranger who sustains a wound in combat is in the hands of the first responding Ranger who puts a pressure dressing or tourniquet and controls the bleeding of his fallen comrade. Directing casualty response management and evacuation is a Ranger leader task; ensuring technical medical competence is a Ranger Medic task. A solid foundation has been built for Ranger leaders and medics to be successful in managing casualties in a combat environment. An integrated team response from non-medical personnel and medical providers must be in place to care for the wounded Ranger. The Ranger First Responder, Squad EMT, Ranger Medic Advanced Tactical Practitioner, and Ranger leaders, in essence all Rangers must unite to provide medical care collectively, as a team, without sacrificing the flow and violence of the battle at hand. An integrated team approach to casualty response and care will directly translate to the reduction of the died of wounds rate of combat casualties and minimize the turbulence associated with these events in times of crisis. The true success of the Ranger Medical Team will be defined by its ability to complete the mission and greatly reduce preventable combat death. Rangers value honor and reputation more than their lives, and as such will never leave a fallen comrade... Antibiotic use and selection at the point of injury in Tactical Combat Casualty Care for casualties with penetrating abdominal injury, shock, or inability to tolerate oral agents. Journal of Special Operations Medicine, 3(5):56-61, 2003. SCOPE OF PRACTICE SCOPE OF PRACTICE RANGER FIRST RESPONDER (RFR) – A Ranger who has successfully completed the Ranger First Responder Course. RFRs conduct their scope of practice under the license of a medical director. Every Ranger is to be RFR qualified. SQUAD EMT – A non-medical MOS Ranger currently registered as an EMT-Basic/Intermediate by the Department of Transportation (DOT) and designated by the command to operate in this capacity. This individual functions as a bridge between the RFR and the Ranger Medic in respect to tactical and administrative trauma management. Squad EMTs conduct their scope of practice under the licensure of a medical director. SPECIAL OPERATIONS COMBAT MEDIC ADVANCED TACTICAL PRACTITIONER (SOCM-ATP) – A Ranger Medic currently registered as an NREMT-Paramedic by the DOT and/or USSOCOM State-Paramedic (Advanced Tactical Practitioner) who has been awarded the identifier W1 (Special Operations Combat Medic) and has been approved by the unit Medical Director to function at this advanced level of care. A Ranger Medic can train and direct routine and emergency medical care, establish combat casualty collection points, conduct initial surgical and medical patient assessment, triage and provide advanced trauma management, triage and provide advanced knowledge in common orthopedic problems, respiratory illnesses, gastrointestinal disorders, dermatological conditions, and environmental hazard illnesses. Ranger Medics conduct their scope of practice under the licensure of a medical director and are not independent health care providers. Ranger Medics should always obtain medical director advice and supervision for all care provided. However, on rare occasions Ranger Medics may be required to operate relatively independently with only indirect supervision in remote, austere, or clandestine locations. In these cases, it is still extremely rare that a Ranger Medic will be unable to communicate by radio, phone, or computer. STANDING ORDERS - Advanced life support interventions, which may be undertaken before contacting on-line medical control. PROTOCOLS - Guidelines for out of hospital patient care. Only the portions of the guidelines, which are designated as standing orders, may be undertaken before contacting an on-line medical director. MEDICAL CONTROL / MEDICAL DIRECTOR / MEDICAL OFFICER – A licensed and credentialed medical provider, physician or physician or physician or physician assistant, who verbally, or in writing, states assumption of responsibility and liability and is available on-site or can be contacted through established communications. Medical care, procedures, and advanced life-saving activities will be routed through medical control in order to provide optimal care to all sick or injured Rangers. Medical Control will always be established, regardless of whether the scenario is a combat mission, a training exercise, or routine medical care. Note that, ultimately, all medical care is conducted under the licensure of an assigned, attached, augmenting, or collocated physician. STANDING ORDERS AND PROTOCOLS These standing orders and protocols are only to be used by Ranger Medics assigned to the 75th Ranger Regiment. PURPOSE The primary purpose of these protocols is to
