NET API to format any source code (including SQL) inside SSMS and other.NET IDE such as Visual Studio, IntelliJ, and JetBrains. The same API can format source code files that are stored in a .NET project, on GitHub, BitBucket, or any of the other source code repositories that supports formatters. By supporting both SSMS and IDE formatters, we hope to become an OS-agnostic way to perform SQL formatting. ## Installing the SSMS UI formatters Add-in You can install the SSMS UI formatters add-in using the SSMS installation media. 1. Navigate to [Images/ssms-ui-formatters-installation-1.png] to download the appropriate package. 2. When prompted, select the package that corresponds to your operating system: [Images/ssms-ui-formatters-installation-2.png]. NET 4.6 and Visual Studio 2015 RC available If you are installing the add-in on a machine where the extension was not installed before, you will also need to install Visual Studio 2015 RC (Microsoft Visual Studio 2015 CTP) before the add-in can be used in the IDE.
