rar , , Modbus-poll .rar , , modbus poll iptables.rar. It is a MODBUS-Poll poller for monitoring and controlling Modbus TCP-IP protocol. It can detect the Modbus-TCP-IP modbus polling IP address and the Modbus-TCP-IP modbus listening port. It can detect a Modbus-TCP-IP modbus device and open a TCP connection to communicate with the device through modbus TCP-IP protocol. The program will show the Modbus-TCP-IP modbus polling IP address and the Modbus-TCP-IP modbus listening port. It will also shows Modbus-TCP-IP modbus device properties, such as Modbus-TCP-IP modbus device name and Modbus-TCP-IP modbus device number. Demo See also Modbus Modbus TCP References External links Category:ModbusQ: Moving a UIButton within a UIScrollView using AutoLayout I am trying to create a slider of images and I want to move a UIButton using AutoLayout so that it goes with the images and is centered above the image. I also need it to be centered in itsSuperview. I have tried doing the following but the views have no constrains... [self.sliderControl addSubview:self.imageView]; [self.sliderControl addSubview:self.button]; [self.sliderControl addConstraint:NSLayoutConstraint constraintWithItem:self.button attribute:NSLayoutAttributeCenterX relatedBy:NSLayoutRelationEqual toItem:self.sliderControl attribute:NSLayoutAttributeCenterX multiplier:1 constant:0]; [self.sliderControl addConstraint:NSLayoutConstraint constraintWithItem:self.button attribute:NSLayoutAttributeCenterY relatedBy:NSLayoutRelationEqual toItem:self.sliderControl attribute:NSLayoutAttributeCenterY multiplier:520fdb1ae7
