Bd singh plant breeding pdf

Want more? Advanced embedding details, examples and help! B.D. SinghDr. Brahma Deo Singh, M.Sc. (Kanpur University), Ph.D. (University of Saskatchewan, Canada) was Professor Emeritus, School of Biotechnology, Banaras Hindu University (BHU), Varanasi, India. He entered the university in 1973 and was a lecturer, an active researcher, a mentor to several scholars/scientists. Dr. Singh has published more than 150 scientific papers in well-known journals, and is the author of more than two dozen books in the fields of crop production, genetics and biotechnology. Some of his very popular books: Plants: Principles and Techniques (10th Edn), Genetics (3rd Aedn), Basics of Genetics (4th Aedn), Biotechnology (5th Edn), Biotechnology: Expanding Horizons (4th Edn), and Plant Biotechnology (3rd Edn). His books Padap Prajanan: Siddhant Evam Widjian and Anuwanshiki Ke Adhar were awarded the first prize by Dr. Rajendra Prasad Puraskar of ICAR, New Delhi. His book Marker Helps Grow; Principles and Practices (2015, Springer) has been well received internationally. Narpat Singh Shehavat has resigned as Professor of Botany (UGC-Center for Advanced Research in Botany) after 36 years of study at Jai Narain Vyas University, Jodhpur. During this period, he served as Head of Botany, Project Manager of The Biotechnology Unit/DBT Network, and UGC-SAP/COSIST and DST-FIST program coordinator in Botany. Professor Shehavat has published more than 125 scientific papers in journals with a reputation and co-edited the book Plant Tissue Culture and Molecular Markers: Their Role in Improving Crop Productivity. He taught cell biology, genetics, molecular biology and crop production M.Sc. (Botany) students. He was a post-doctoral research fellow at the Department of Biology, Yale University, recipient of Biotechnology Overseas Studies Associate DBT, The Government of India, and worked at the University of Minnesota, St. Paul, USA as a visiting scientist in plant genomics. He was a mentor for Graduate Students/M.Phil. Students/post-doctoral fellows/young scientists/UNESCO-Keizo Obuchi guy, and served as a national correspondent (India Chapter) of the International Plant Biotechnology Association (IAPB). He is a member of the State Council of Higher Education of Rajasthan. Flipkart Online Private Limited, Alyssa Buildings, Begonia and Carnation Embassy Tech Village, Outer Ring Road, Devarabeesanahalli Village, Bengaluru, 560103, Karnataka, India CIN : U51109KA2012PTC06107 Phone: 1800 208 9898 Beginning of your crop review: Priplencs and methods This review was hidden because it contains spoilers. He received a bachelor's degree in agriculture from Allahabad Allahabad The Institute, Allahabad, India and Master's Degree in Agricultural Botany from the Government Agricultural College, Kanpur, India from the first position at the university, and was awarded the gold medal of the university. He received his Ph.D. from the University of Saskatchewan, Saskatoon, Canada. Professor Singh has 40 years of experience teaching and researching in the field of genetics and reproduction of pulsed cultures, plant tissue culture, nitrogen bio-fixing and molecular markers. He has published more than 150 scientific papers in well-known journals and is the author of several books in the fields of genetics, crop production and biotechnology. He was awarded the first Award by Dr. Rajendra Prasad Puraskar in 1987 and 1990 by the Indian Council of Agricultural Research, New Delhi for the books PadapPrajanan and Anuvanshiki, respectively. Ashok Kumar Singh Kumar Singh, a member of the National Academy of Agricultural Sciences, India, is currently head of the Department of Genetics at the prestigious Indian Institute of Agricultural Research, New Delhi. He holds a bachelor's and master's degree from the Hindu University of Banaras, Varanasi, India, and received his Ph.D. from the Institute, where he currently works as a dedicated rice teacher and breeder. It has been associated with the development of eleven varieties of basmati rice, including the first super-ton grain aromatic rice hybrid Puza RH 10, which combine earliness with higher yields and higher performance per day with excellent grain quality and cooking. He successfully integrated marker selection to include resistance to bacterial decline, explosion, brown plant drought, salinity and immersion in rice varieties. His current research interests include TILLING, bio-search genes and new alleles, as well as markers facilitated by rice breeding. He is well known for his contribution to Basmati rice farming and cultivation using markers. He has more than 70 scientific publications in international reputation journals, and he has been awarded several awards, including the Borlaug Award 2012, the Rafi Ahmad Kidwai Award-2013 for his contribution to research and Bharata Ratna's Dr. C. Subramaniam Award-2013 for his contribution to teaching.
