Sign up. Coming out of the June 8, 2020 support tension pole shower caddy is a great way to keep all my hair and body products organized. Unlike caddies that hang on the drain, it remains solid standing because of the voltage of the rod. The basket is also adjustable so you can move them anywhere along the pole. I'm a little taller, so it's nice to be able to move them higher. The chrome finish is great because it is very easy to clean and looks like it will remain shiny unlike the white caddies that can start to stain over time. very pleased with this product! Helpful? May 23, 2020Real liked this product. However, my husband and I really struggled to get it together. It looks simple enough, but the height of the shower varies, so instructions should be tuned to the height of your shower. We didn't understand this as we set it up, so it took us a good time to realize that there was a chart in the back that explains how you can adjust it based on different heights. Big mistake on our part! You should read the directions in full. Anyway, aside from that, once we finished tweaking and put it in the shower it really stuck there perfectly. No wiggle or anything. Metal is SOLID, so it feels really good quality. Chrome is very beautiful too! No more shampoos in the whole place! Helpful? May 30, 2020Y always wanted one of them. Works great! He's very strong. Holds heavy bottles of shampoo and conditioner. I wish there were some hooks for hanging to wash towels, but I really can't complain, it works and feels spacious in the shower. Also looks organized now, not like before where there was a bottle here bottle there. It seems to keep the weight very good. And the chrome color doesn't look cheap. We used all the poles and all the diggers. The setup was about 10 minutes. I love it! Helpful? May 26, 2020I just got my Mainstays Tension Pole Shower Caddy's Chrome finish. The first thing I noticed was the box arrived damaged and the actual product box was also slightly damaged. Fortunately, the shower caddy itself was not damaged. The shower of Caddy is easy to assemble and will not take me very long. The chrome finish is really nice to look at in my shower. It has three shelves, which is plenty of room for all my shampoo, conditioner, and body wash. I noticed my razor fell right through if I him in a certain way. Overall, I'm very pleased. That's exactly what I needed in my tiny shower. Now I don't have to crowd the side of the bath with all my 1, 2020I was given this Mainstay Tension Pole Shower Caddy try in exchange for my honest review. I'll start with the instructions that this product comes with. It shows you the details of all the pieces and they are marked in instructions as well as on the bags, so you'll know what parts you need based on how high the shower is. While the instructions are well organized, note that the instructions show you the assembly of a standing shower pole assembly that is 96 in height, because if you don't pay attention to it, it can make the assembly a little confusing (because it made for us at first). Just make sure you read the instructions carefully and you get the build right for the first time. While the instructions tell you to add racks at the poles before piecing the extension of the poles together, my husband and I realized that it would be much easier to just first plug all the poles and then set up the racks at the poles with rubber seat holders afterwards. It just makes it easier. Once we've created it all, we put it in the shower, which you have to do sideways, as there are voltage springs inside it. We had it in our shower for 3 days and I like how well it holds; it's nice and sturdy and able to keep mine, my husbands, and soap 4 kiddos, shampoo and razors. The only thing I would ask Mainstay to do differently is to add some hooks to hang loofahs and bath sponges on. We still have our caddy who hangs over the shower head to keep our loofahs on. You can probably also just install loofahs inside the rack as well. Overall, I recommend this pole tension shower for those looking to save the shower space as well as have a decent amount of shelving to store your shower goods. Helpful? May 22, 2020 My children all share the same bathroom and everyone likes to use different shampoos and body washes. I bought something to hang with the shower, but tall bottles of shampoo don't fit. So I bought this because it's adjustable and hopefully will work. My husband is now all put together. This item is similar to what I used to have in my last place and now I have a new one where I am now. Helpful? June 16, 2020I received Mainstays Tension Pole Shower Caddy, Chrome free from Spark Reviewer in exchange for my honest opinion. As a family with minimal shower storage space these shower caddy have become a necessity. I installed this one as a second in the shower to store my son's bath products and toys. The instructions were a bit unclear, but after a few mis-starts I got it together pretty quickly. It seems pretty sturdy as I was able to put two large bottles of shampoo/conditioner on one shelf without the shelves sliding down, the big problem I had with the shower caddy was Spacer that they then want you to cover with silver tape. The tape doesn't go smoothly and doesn't look better. Fortunately, it's to the beginning, so it shouldn't be too big a problem. Overall it's like a decent shower caddy if you have a need for one. Helpful? May 23, 2020After installing the product, I will be uninstalling it. The poles are flimsy and there is no way to make them tight around fittings. They slide into each other and then can rotate freely. After installing the base to the ceiling there is a minimum voltage and the slightest movement moves the entire product. Baskets are the only nice part about this product as a whole. The instructions are decent, but the product lacks strength. I worry that this is something that will eventually tip over and for that reason I will be uninstalling it. The poles also scratch easily and there is space between them where the water can eventually clear up in creating mold in areas that you cannot clean. Helpful? This point is terrible.... its not solid and parts don't fit properly. I wish I had come back and bought another brand. After putting it loose and has a curved mind you have it only been for 1 full day. Terrible, horrible awful wish, I'm back, but I've already collected. Helpful? May 26, 2020Un the simplest instructions to understand. After the build (finally!), it really fits. However, the pole is so flimsy I don't see the ability to place more than two things on it. If I actually paid the money for it would be back in the store in a second. I also think keeping it clean would be a nightmare. We have heavy water and I know it will be a mess in a few weeks. I don't plan on using it. Helpful? February 16, 2020It happened at the right time. My son had just returned home and we all had our own bath items in the shower area. They kept falling from the small shelves that are there, so we were so happy to get this. This is a multi-storey shower caddy. I got it in nickel as it colored the rest of my bathroom accessories. Shower Caddy has 2 deep baskets with hooks on them to hang everything you need. The baskets are deep enough to keep shampoo and soap bottles easily without them falling out. It also has a flat shelf to keep things like razors etc. It's a voltage rod, so I don't have to worry about it falling on anyone as it's secured in the corner of the bathroom surround and walls. Helpful? I bought this bathroom caddy and I am completely happy with my purchase. Got here on time, easy to install (I did it myself) and it was simple and not expensive. Hope this helps make your decision family? December 16, 2019 Mainstays Tension Pole Shower Caddy helped us reorganize the entire area our bathroom. We use to have bottles on every corner of the bath and and of them often slip into unexpected times. This caddy was able to keep all our room bottles to spare. It even has a soap-only shelf. We absolutely love this new system. There are even small pens on the shelf to hang face towels or loofahs off. This is a small feature that can be easily overlooked. I like how there is a giant spring in the upper pole to maintain tension. It doesn't look like the voltage rods that require you to twist it tightly. There is some game near the middle shelf, but it's not enough to make the pole fall. There is room for improvement in installation instructions. All the steps assume that you use the highest setting, so there were times when I added an extra pole that wasn't needed. Make sure you measure the height of your opening correctly, otherwise it can damage the wall if you force it in. Helpful? May 3, 2019Y am writing this review as part of the Walmart Spark review program. This item was easy to put together. It looks great in my bathroom and fits in the corner without taking away the whole Lotta room. Three shelves give a lot of extra space for many of your bottles and other products. There's room for your soap. You can hang a body brush or washcloth with hooks. You can put a razor on a ledge with a soap dish. The material looks to be durable and hopefully there would be rust. I appreciate an area where you can turn your shampoo bottles upside down. This makes it easier to distribute your product. The shelves are very generous in space but don't take much space in the shower or the bathroom itself. Helpful? May 14, 2019Super is pleased with the Mainstays Tension Pole Shower Caddy. I had one in my bathtub for a while, but it always seemed so cluttered, the shelves weren't big enough and were shaped strangely. This one has fewer racks, but looks much more organized. It has large shelves and all of our bath products fit perfectly. There are two areas on each basket for loofahs to hang. The center of the bar soap tray and has holes to hold water. I like things to be more organized. Of course, I recommend this product. Got free Hypnot? May 3, 2019 I found Mainstays Tension Pole Shower Caddy, Satin Nickel, to be an extremely useful and versatile shower tool. This shower caddy matches brushed nickel shower fixtures almost perfectly in my tiled shower. It is very versatile in that it can be used in a variety of shower or bathroom situations based on different parts configurations. I was able to put it in the shower, which had no other storage options, and now I have a great place to store my and soap, and hang a rag and scrubber. This shower caddy was pretty easy to assemble based on directions and in my case took about 10 10 shampoo, conditioner and other bottles. I was able to set the basket at a light height to be reached and that height could be changed depending on your situation. I highly recommend this shower caddy for those who need storage solutions in the bathroom or shower who are not looking for a permanent installation. I can take it off in the future if necessary, no one knows that it was used. The soap tray is large in size and does not allow the soap to fall to the ground as I have experienced with other models. Helpful? How easy it was to adjust even after guessing and looking measurements. Excellent fit was from the added inserts. Helpful? May 5, 2019This Caddy does not require tools, but a measuring tape is offered. I didn't use the tape. That's why it took me a little longer to determine which poles to use. In general, it is easy to collect. My only compliment is that the final product doesn't feel sturdy. Although I haven't had any problems so far. I added soap, professional-sized shampoo and conditioner, as well as shower lotion to the bins. Good for a bath or a shower. It's a versatile caddy that I love. Helpful? May 3, 2019This review for Mainstays Tension Pole Shower Caddy, Oil-Rubbed Bronze. This is the second one that we owned and I will say that we have never been able to turn back from one of them. This is very useful in storing and organizing all our shower supplies. The shelves really fit a lot. One shelf fits about 5 bottles of shampoo and conditioner. The central shelf is ideal for soap bars or razors. Our first was chrome, but eventually rusty and looked ugly. I hope that the oil rubbed bronze will hide that it is better if it happens, hopefully it will not, but everything that sits in the water has a high chance of rust. It was easy to install. At first I was afraid that he would break the ceiling, because the tension seemed very tight, but everything turned out well. I love convenience all the time at eye level rather than bend over to grab your shower accessories. It's really convenient, it works well, it was easier to install and seems to be of good quality. Just keep your fingers crossed that it doesn't rust, but only time will tell. Helpful? May 14, 2019It was very easy to put together, but when we went to install it the spring popped up and it collapsed. He scratched our BATH BRAND NEW. Needless to say, he went to the trash! Helpful? Garbage! Helpful?
