

The Robinson Country Intelligence Index

A dynamic, holistic tool that allows users to undertake insightful, clinical diagnoses of countries and international topics.

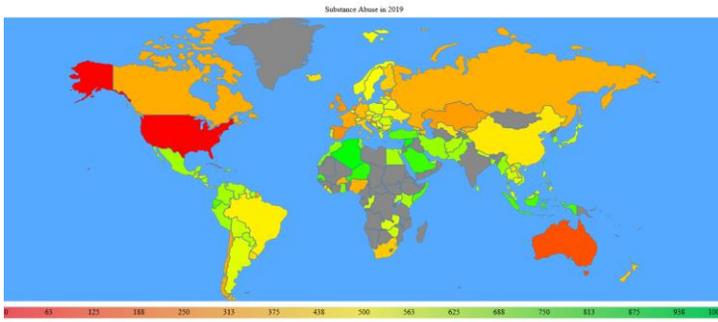

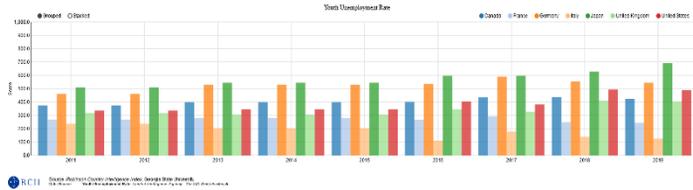

Four broad dimensions

The RCI encompasses four broad dimensions: Governance, Economics, Operations, and Society (GEOS). From there, the user can drill into 114 sub-dimensions across 199 countries, and, at present, 15 years of data. Drawing on over 1.3 million data points from more than 30 sources, the RCI provides a dynamic data literacy and visualization instrument for students, educators, researchers, and practitioners.

Tell a story with the numbers

Tell a story by starting the conversation with the numbers! Examine change over time! Use the RCI's wide variety of data visualizations to tackle class assignments, research questions, or internationalization puzzles facing your organization.

Customize the RCI

Create new indices based on your own entirely unique conceptualizations using our *Build Your Own Index* functionality. Upload your own data into the tool. The RCI is highly adaptable to the needs of the user.

Subscription Information

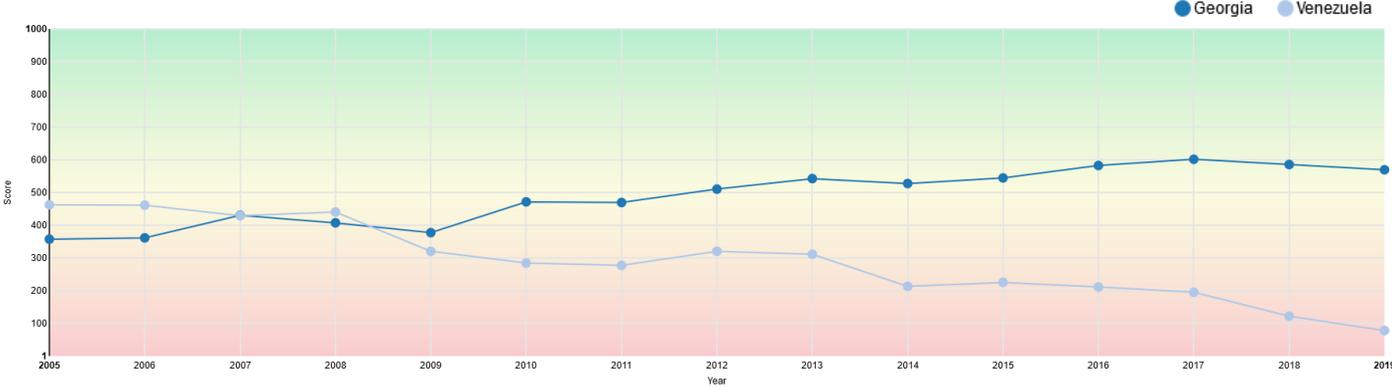

Type of Subscription	Price	Additional Content
Non-Academic	\$100 for One Year	n/a
Academic Semester	\$25 for Five Months	Includes RCI pedagogy
Academic Year	\$50 for One Year	Includes RCI pedagogy

The Robinson Country Intelligence Index

OVERALL RCII

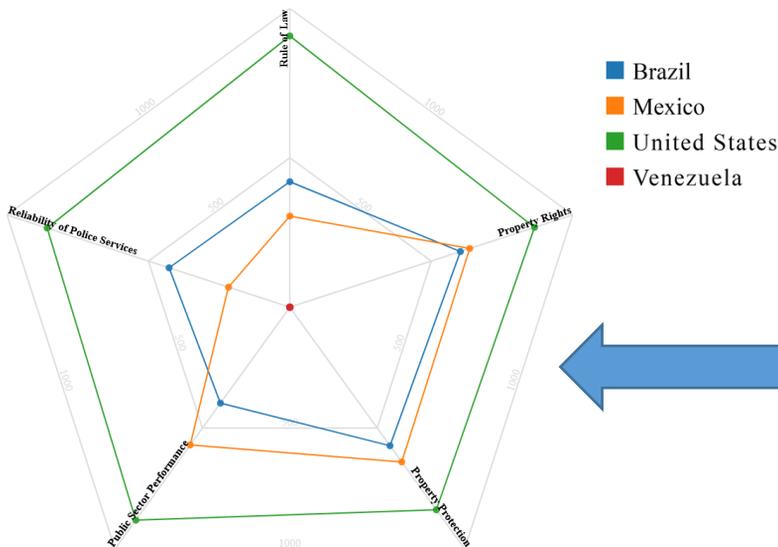

Source: Robinson Country Intelligence Index, Georgia State University.

Top 5 RCII "winners" in Rank over 15 years		Top 5 RCII "losers" in Rank over 15 years	
Georgia	↑ 48	Venezuela	↓ 52
Rwanda	↑ 43	Trinidad and Tobago	↓ 34
Kenya	↑ 26	Jordan	↓ 33
Indonesia	↑ 21	Algeria	↓ 25
Nepal	↑ 20	Iran	↓ 25

Above: The RCII longitudinal chart above provides a visual representation of change over time in Overall RCII score between Georgia and Venezuela.

Left: "Winners" are the countries seeing the greatest improvement in Overall RCII rank over the last decade, while "losers" have declined the most during that same period of time.

Troubled Venezuela

This radar chart shows that Venezuela scores as the worst country in the world across five key variables: Rule of Law, Reliability of Police Services, Property Protection, Property Rights, and Public Sector Performance. Here, we've compared the troubled state to the U.S., Brazil, and Mexico.
