

A light orange silhouette of a dog, possibly a Golden Retriever, is positioned on the left side of the header. The dog is standing and facing right, with its head slightly turned towards the viewer.

Discover Your Dog's Unique Genetics with GenoPlex® Canine XCAY Panel

Every dog is a unique individual, boasting distinct personalities and traits. With the GenoPlex® Canine XCAY Panel, you can unlock the secrets of your dog's genetics, revealing their ancestral lineage and genetic makeup. This innovative panel identifies potential hereditary health risks as well as genetic traits and behavioral tendencies, making it valuable for all dogs, whether purebred or mixed breed.

Comprehensive Polymorphism Data

Our product encompasses a wide range of 137 dog breeds, allowing you to confirm your pet's breed composition and ancestry. Uncover the hidden stories behind their lineage with our in-depth genetic analysis.

Parentage Verification

In addition to breed identification, we provide exclusive parentage verification, giving your pet a unique genetic ID card that highlights their heritage.

Personalized Health Management

With tailored health management features, our service enables you to create customized health plans based on your dog's genetic test results. This includes dietary recommendations, breeding advice, medication guidance, and grooming tips, all designed to enhance the health and happiness of your furry friend.

Genetic Disease Screening

Protect your dog's health with our comprehensive screening for 132 genetic diseases. Gain insights into potential hereditary risks, allowing you to take early preventive measures or monitor specific health issues effectively.

Health Risk Assessment

Stay ahead of your dog's well-being with our health risk assessments. Receive valuable information on potential health risks, enabling you to take timely preventive actions or schedule regular health check-ups to ensure your pet's optimal health.

Behavioral Trait Analysis

Enhance your understanding of your dog with our 12 behavioral trait analyses. This feature evaluates your pet's personality traits, such as courage, excitability, focus, and obedience, helping you train and guide your canine companion more effectively.

Embark on a journey to discover your dog's heritage and ensure they lead a healthier, happier life.
