## Susan miller virgo july 2020 horoscope

The last few weeks have brought about some changes in everyday life. He had two eclipses last month, and this month Capricorn has another on July 4-5. Eclipses often warn of significant changes, and this important news will be related to the sixth house - health. It is important to be careful in such epidemic times by avoiding unnecessary movements. Eclipses bring nonexistent changes to the market, so keep in mind that you won't have the opportunity to go back in time. On the other hand, eclipses push us forward, take us out of our comfort zone and help us move forward. At the same time, just as something ended. It could be a project you've been working on for months, maybe even years. The time has come for something new, and most likely, a new project will soon be knocking. The new moon on July 20th will not be an ordinary month. Saturn and Pluto will oppose the new Moon and Sun, so this may bring new responsibilities that may be related to the settlement or any property you own. Again, after July 20, you need to continue monitoring your health as this can cause you to feel tired in the slightly stressful new Moon. Even if the new moon isn't an eclipse, it's going to be like it is. Wednesday will go in the background this month, starting on June 17 and continuing until July 12. It's not a good time to sign a letter of words. Mercury's background is a good opportunity to explore expectations and identify new strategies. Mercury is always a signal for progress at every stage of life in the background, personal and professional. On the other hand, Mars has quietly moved to the ninth house of people and foreign countries, so the desire to travel will be strong. Mars will go into the background from September 9 to November 13, so if you have a deal, future project or initiative, it's a good idea to close the details by the end of August, not later. If this is not possible, try to delay final decisions until December. Mars regulates competition, and if you want to be the best in your field, you don't have to start when Mars is in a lethargic position. The ninth house travels and international relations lead to more - it also regulates their efforts for a visa, card or citizenship in another country. Finally, you can focus on these issues: If you work in the field of communication, it is likely that you will have many duties on the table in the next six months. This can be the perfect time to write a book, or script, ask about starting a series of podcasts, TV or internet shows, or after an app on the market. There are many possibilities, but the point is to start now and aim for the product on the market in 2021. Even if there is to be a period of correction, you will feel proud. Is it possible to find love during epidemics? Answer for virgos You will always have the star power to attract someone and Jupiter will work with its magic to ignite sparks of love. You will meet a common friend or work together on a project. However, it will be a purely professional and intimate relationship - as a start- and then it will become something else. There were two eclipses last month. The Spring 5 June eclipse highlights a series of considerations for a or home and family. The June 21 eclipse is likely to have brought about changes in a long-term friendship, and one or two new friends in your life may have introduced you. This month's new lunar eclipse was the Fourth of July Capricorn and will be focused on the romantic relationship. If you're dating someone, you need to decide to move on to another stage. If you don't feel ready to make a decision, the universe will create the right conditions for you. Eclipses push to move forward. Virgos born on September 2-9 will feel the eclipse the most. If your birthday is in August, you probably felt the eclipse more on June 21. If you are married or in a long-term relationship, you may decide to have children or prepare fun activities for the family. This moment will regulate creativity, if you have completed a project, you will have the opportunity to present it to the world. Opening up for a new way. Mars has moved into other people's money eighth house? In that time, he will think more money than ever before and may come to the conclusion that he has spent large sums. Maybe because you're investing in a property or renovating your residence. If you are self-working, you can work on a new project. Otherwise, you may have dealt with something that would change your lifestyle: a movement, you can have children, you go back to school. These periods require more income and will be the desire to make more money. Keep your eyes open, especially next month, for new opportunities to emerge. On July 20th, the new moon will be Krabs. It's not an eclipse, but it's still a difficult time. Here the focus will be on a friend. He/she will try, but it seems that he/she will not appreciate his behavior. The possibility of a rift is not ruled out. If this man is important to you, take the time to decide what to do. It could take a few days. Some of the greatest pleasures you will experience this month will be related to your situation and your growing reputation at work, so take care of as many projects as possible. Important people will continue to praise you. Stay focused - the money you need will come as a result of your performance. It's time for success. This will bring surprises at every opportunity, some of them And he will play out on this world stage as well as in his personal life. The problem is that the experience will most likely be quite exhausting and infuriating, not exciting. I rarely seem to be a moon with so many planets in an angry mood and do not get along with each other. There will be a high drama scene from time to time, but it's not the kind of drama any of us would want to go through. Still, when planets are like this, it bothers us that we move, take care of what we're putting off, and face reality from a new perspective. After all, such a month releases us from the decaying situations of the past and gives us a late November and December move forward (I'm not talking about coronavirus here, but general conditions). Planets clang and bang, creating a high turmoil, they test the power of our initiatives, relationships and rely on some individuals and institutions. With the planets so active, anything that is not powerful will quickly collapse on it, paving the way for new and better innovations to replace what has been lost. I say lost, but in that sense I mean that if something doesn't fit the test that the universe sends to each of us, every sign, this month, will be swept away in the blink of an eye. If he doesn't follow the test, he'll stay strong. It depends on how things go in your life until the end of October. For most of the month, your focus will be strongly financial. The moon begins with a full moon, 9 degrees, October 1, and is effective for four extra days. Something's coming out or ending. You may be expecting a long-awaited payment, and if that's the case, it could represent a commission, royalty check, or insurance premium. Maybe an inheritance will be settled or you can handle the university's financial aid. Alternatively, you may discover serious errors in the credit report or credit card statement, and you may need to work to correct the error. The money may come, but the money will fawn.
