If it's this Since a long time you have read Iron Gold or Red Growing Sabad, I recommend you read the entire series before reading Black Age. I didn't do that and I really believe that the reading experience of this book was affected by it. Second, 3.5/5 Sathasguri (literally) is a place of mad, violent, desperate, and merciless. Haldavaras, drilled by the dark-aged barbarism-preparing your spirit. The laws are silent during the war. -Quantos Tollaust First two things cessaire. It has been a long time since you read iron gold or red growing sabad, I recommend you read the entire series before you read the black age. I didn't do that and I really believe that the reading experience of this book was affected by it. Secondly, throughout the year after the red growing publication, many people still insist that this series is for the audience; When you read this book, you may be incondigent or will probably choose the book for its extreme darkness. Seriously, the dark age is one of the darkest, bleakest, and gi novels I have ever read in my life; the hilarious and charming aspects of what is common to find in this regard are non-present in this episode. I'll modify this review in the future when I read the series from the beginning in preparation for the holiday and maybe-the last book of the series, but for now, this is my thoughts and opinions on my first reading black age. With every new effort, always hope you will find happiness, be less lonely. I mentioned before, out of all the books released in 2019, which are a little hated by Chromebe and Black Age at the top of my most anticipated release list. I've already ordered black age since February 2018, it's a year six months ahead. I've never done it for any book. My expectations for these books were extremely high, a little hate exceeded it, but sadly, for the first time, I have to say that even though I was still enjoying it overall, I did not find the age of darkness, I as my hope belonged to many of its fans as the best book in each one. I once thought the biggest sin of war was violence. It's not. The biggest sin is the need to be this good male practical. The final installment of Dark Age is fifth and the growing saaaof red by Pierce Brown. By this point of the series, it's safe to say that I can't talk about this plot unless I risk spoiling the story, so I'll not talk about the plot at all. I just have to say that there is no happy moment for news, and everyone is constantly tortured, tortured, unwee, and killed. How about? The book's title is the first of many of the book's head: complete pressure darkness, dispersion, gore, barbarism, desperate, death, violence, violence, and violence; it's so far And the darkest episode in this series by far. I honestly never expected the series to become this dark, and with the addition of darkness, the stop of the book felt far from me. There were many moments of understood intensity that Desansatade felt clearly unrelated pages caused by no break. Imagine the rape of the attempt, the impalaimantus, the jinnang motalatanas, the misuse of drugs, the adhesion, gore, death. You have its name and hundreds of pages here. After a while, the clear details of the violence became a constant display of the sack. Pierce Brown is their best when they have their own story full of a sequence of action combined with frustration and charming moments with terrorism. Unfortunately, his prabha was lost more and more in this book. If you check my reading history, you should know that I do not understand the gramadaaark SFF in reading violence, gore, and heavy food. They just need to adjust to it, and I can't say with-the-back-brown that right now connected the cane with their action stowed. No God hears. There are only men. And what it does, one can undo even more. This is my only religion. He has his hand and his lower hand. Brown has many capital moments of this series such as the development of the brilliant character, the clear and comprehensive plot link, in exchange for the most uncouth, engaging. Also, there is a severe lack of appearance from my favorite characters of the series. For me the letters were basically really lacking compared to previous books. There were many events where the pov of iron gold's new characters feels like the filers put them to include the counting of pages. What Brown tried to get with them finally got clear but still I believe that he still didn't need many pages. Thankfully, here's a new perspective role to follow. Its chapters were relatively small compared to the other four POVs but its story was easily my favorite in this book. I would also like to include this plot device that revolves around dead letters is a personal pet of mine. Sometimes they worked, often they don't. Let's just say that the brown is pulled out of here which does not work for me. How many you don't know. How soon you will forget. How much do you appreciate for presenting insults today. The fame of the berm is against the power, the kingdom of the individual. All that will be met, which is the most, is your own skill. I did not work for me here about things that did not work here, but the rest assured that it's not all bad. Time for me to talk about the incredible parts of this book that I loved. I've always loved brown yators, that didn't change here. If it was not because of his writing style, I might have fed him Book somewhere in the East. Although I have complained about the overly desperate and violent nature of this book which made the stop strange, I will not deny the fact that there were many devastating scenes, in my opinion, were so well written. These characters were very impressed. Those horrible things that were crazy to bear, to say the least. And I can't help it but feel empartitic towards the main characters of the series. It is also satisfied to see how much this has increased in terms of capacity. Dark age is massive in capacity; The level of increase in its scale is something that has taken me by some surprises, and I am grateful for it. You know I'm sure we all start with equal parts light and dark. I fear you that your power is in your darkness. But man does not fear measurement he sows in his enemies. Hope he gives it to his friends. One last thing before closing this review, Brown successfully ended the age of darkness with a blast. The closing portion of part 3 and the full part 4 was absolutely spectacular; Very twists, and changes were written with brilliant explanation. The brown story style in these parts was a return to the love that greatness. Action scenes are a cinematic fashion filled with clear intensity and anger that has cursed every fascent scene. If I had to classify this book based on these parts, I'd classify it into 5 stars in heartbeats. It was really fantastic. In addition, it also set up every plotline for the grand finale to come to the next and final book. But for the love affair of this new civilization with technology, they have been disheartened by their own cleverness and failed to understand the simple truth: lying is not a science, it is an art. And art will always be human language. The age of darkness may not be as fun and as fun as the previous books, but it was definitely epic in the heart, and scope. Many fans have started claiming that the best book of black age in the series so far; Unfortunately, I have to disagree with this concept. However, well the story is over here, the next book may really end up becoming the best in the series for me. I look forward to seeing The BlueDayhow it all ends. Until then, I will bear it.
