this is why we are not only s... Why we should be proud of our female president. A long, long time ago, when women could not vote, to do the simplest thing like go to a movie was a big deal. T...Q: Flutter - custom _Adapter.map(): Typescript I'm trying to implement _Adapter.map in a flutter-ui project, but I'm getting the error: _MyAppState.dependencies.dart/_Adapter.map(): no type or interface named 'Map', '_MapBuilder', or 'map' was found My code is like this: import 'dart:async'; import 'dart:convert'; import 'package:flutter/material.dart'; class _MyAppState extends State { int _selectedIndex = -1; List _todos = [Todo(id: 'a', text: 'a', completed: false), Todo(id: 'b', text: 'b', completed: false), Todo(id: 'c', text: 'c', completed: false), Todo(id: 'd', text: 'd', completed: false), Todo(id: 'e', text: 'e', completed: false),]; @override Widget build(BuildContext context) { return MaterialApp(debugShowCheckedModeBanner: false, home: Builder(builder: (BuildContext context) => Scaffold(appBar: AppBar(title: Text('My App'), leading: IconButton(onPressed: () { _selectedIndex = index; }, icon: Icon(Icons.520fdb1ae7
