December 15, 2020 Version 26.0 Update Alert!- Continue the fun with 50 new & EXCITING Levels!- Bug improvements and fixes. Thank you for playing Bubble Shooter! Stay tuned for more exciting updates! The game is challenging and fun, but there are several things that are definitely misrepresented. If you buy another 5 shots you say specifically you get five shots PLUS one fireball. That's not of true!!! If you use the fireball you only have four shots. With your 15 coins you are buying 4 shots plus a fireball or 5 shots and no fireball!!! I experiment with all 3 Bubbles games I play. Another thing I think is wrong is that if we earn a fireball or a drop of bubbles in the last game, it should be available before the game closes. It was earned during the game period and should be able to be used within that game time period. Also, I don't like bubbles over and over each other in colors that aren't even on the board. I'm so frustrated when I went down to the last ten shots and not a bubble is a color on my board. Hi, thank you for sharing your review with us. We have forwarded your experience regarding the number of shots received to our developers for further consideration. It will be very useful if you can provide us with further information about the exact scenario at The Bubble Drop, please note that every booster you earn during a certain level is unique and associated with the level itself, as this is part of the challenge. Finally, part of the challenge is solving the puzzle with the colors you receive. It is impossible to receive a color that is not on the whiteboard, although it may appear later. If you've tried everything and still can't solve the level, send us a support@ilyon.net email and we'll do our best to help. :)Sincerely, Ilyon® Support. I'm not sure it's a coincidence, but it seems the game has become much more difficult after the last two updates. I'm stuck at level 1582, so I decided to update the app to see if it was a bug. No luck with 1582 after the upgrade, so I've tried dozens of older levels and they're also much harder than before. Many of the levels leading up to 1582 (as in the 1570s) were also extremely hard and unusing. I had to buy several extra power-ups/moves to get through the last 10 levels or so, when I could normally get over the levels in a few attempts without much need for power-ups (unless I really wanted to get a higher level). This is also a bit fussy, but it's annoying that the game asks if you're sure you want to restart a level because you'll lose progress. The game looked like it worked smoother before he asked for it every time. Also almost every time I enter a level, even though it's one I've completed before, the game tells me about the special types of bubbles in the level (such as ice bubbles or bubbles that turn into stone). It's a bit annoying that this information I get almost every time I play a level. But above all it is a pity that he can no longer go on in the game. This is my favorite Bubble Shooter app and I've looked at others since this one has become too hard to be fun (1582, for example, is so full of stone bubbles that fireballs and bombs aren't even really effective). Hi, don't worry, we can help you with this problem. If you have tried everything and still can't solve the puzzle, email us to support@ilyon.net with details of your current level + your customer ID and we will do our best to help you. :)Sincerely, Ilyon® Support. I'm been playing for years. I'm at level 4,000 something I believe in. I liked playing this game, but the levels became almost impossible to complete. Not in a fun and challenging way, but in one way we want you to spend money on coins. For example, I'm playing at a level and I still have 8 shots with 2 color choices. One of the colors I need 2 shots to take it out and the rest are the same color. Bubble options give me 8 of the same color instead of both colors. to add insult to damage It does not give me the watch ad for multiple shots option. Issue 2: When I have a few shots left and an ad will give me the shots I need says there are no more videos. So I play the level and I'm a bit close but not as close as the first time I have the option for 2 videos. Make sense! Problem 3: Sometimes when you shoot the bubble it doesn't go where you turned it, it goes at a shorter distance and it only happens when it's a game that will make me an explosion or a fireball. Issue 4: The new update added in the cards that give you extra, and then you get small packs and if they reveal your card 9 times you get that prize. All my cards only need another one of that card family and in the last 2 months I haven't had anything from the packs. This game has gotten worse since I first got it. I don't even recommend it anymore. Hello! It's about creating fun games :)As you stated, you're currently playing at a very high level, and as such, the challenge is that level, it could be noticeably more challenging. The best part about this game is that it is completely free to play. Claim your daily bonus, complete as many levels as possible, enter races, and even get assistance from other teammates :)We've also introduced the new collectibles feature, which is a great way to earn more FREE rewards. However, completing all packages may take time, as some cards are rarer than others. We have forwarded your feedback to our developers for further reviews and hope you continue to enjoy the game. You can always share your thoughts with us at support@ilyon.netSincerely, Ilyon® Player Experience.
