

BENENDEN HOSPITAL

Benenden Hospital completed its new build with refreshed facilities, which focused on delivering a calming and restoring environment for patients including technology as art.

LG worked with the hospital and integrators OOHSCREEN to install 15 LG 55" 55LV75A. The displays are configured in sets of three, resulting in five consecutive HD videowalls. The resolution and brightness of the displays emphasise the artwork to display the outdoors indoors, creating a calming environment for waiting patients.
