

Convergence Canvas

 atoms, real world

 information, bits, digital world

●→● *Transport*

 transportation

self-driving cars, drones, autonomous vehicles of any kind, eVTOLs, and also space exploration

 **IOT**

Internet of things, sensors

 network

5G, global broadband, quantum internet

 **3D Printing**

3D printing, additive manufacturing, nanotechnology, material science

 **SynBio**

genetic engineering, gene sequencing, gene editing

 **AI**

artificial intelligence, machine learning

 *Automation*

 robot

 **AR/VR**

virtual reality (VR), augmented reality (AR), spatial web, metaverse

 **Crypto**

crypto-currency, blockchain, decentralized finance (DeFi), decentralized autonomous organizations (DAO), non-fungible tokens (NFT)

 *Power*

 energy

solar power, wind power, geothermal power, tidal or wave energy or anything else that is truly renewable also includes battery technology

 computing

including quantum computing, brain-computer interfaces (BCI)
