How to download pokemon dark rising worlds collide

The outbreak occurred in the Ferrum region. Digital monsters known as Digimon have combined their data with Pokemon DNA. You, Ryu/Ruko, join an elite team of Pokemon trainers known as the Dark Rising team to explore the phenomenon and defeat the 7 Great Demon Lords that have been unleashed by Satan's Pokemon, Darugis. It's purely so fans of both Pokemon and Digimon can get a combination of two with a host of Dark Rising Glitch characters in Rom Base - Magic Bounce can cause errors when using opposing Pokemon in trainer fights (has a chance to deflect attack damage programmed as status moves such as Moonblast) - Infiltrator and Magic Guard are not 100% complete- In combat, snow Warning's ability may ever tell you that your opponent may someday tell you that your opponent (for example: Frigimon (insert the enemy's ability here) has made it hail) - A few moves don't have their correct effects, but they work.- Sticky Web sometimes does some strange things.- While Moonblast functions, as it does in 3DS titles, it's programmed as a status move and thus won't work with West's Attack (The Same thing does the exact way out of the damage) , the text claims that the item prevents you from working. This is not the case, and the escape rate is calculated normally.- Life Orb and Rocky Helmet are not yet fully implemented.- Geomancia does nothing but waste the player turn by absorbing power.- When you attack an opponent who has the ability to Gooley, he says that the enemy's speed has been reduced, but it's actually your Pokemon/Digimon who the speed has been lowered. (In other words, the ability works like it does in Pokemon X and Y, but the text is wrong) - Solid rock and filter can weaken the normal efficiency of movesMinor things that I can fix in the final version - All the data in DigiDex is complete, But some words may overlap the screen or be located too far apart.- Mega Swampert and Mega Alakazam don't have shiny sprites.- Not all Digimon have shiny sprites.- All screams aren't inserted.- Map of the city is not updated- Image for Firestone is glitchy, but the item still works. - Be Elzemon has a Deoxys icon in the Pokemon menu.-If Calista sends a bad egg and the battle is not a double fight, you play an outdated version of the game and need to download version 1.3 below.- Some Digimon sprites are temporary seat holders and will be updated for better quality in the final version. (These problems can only be fixed by the creator of the Rom base, so I can't estimate when and if they are ever resolved) - The Move, Knock Off, is one of the best moves in the game because of its effect of removing held items from opposing monsters in battle. Gym and event coaches will always hold items on their their So removing them is an effective strategy to win more difficult battles.- When building a team for the challenges that await you, be sure to use both Pokemon and Digimon. While Digimon may seem stronger at first, they often develop slower than Pokemon, which could put you at a disadvantage mid-game.- Solid Core 3 at the center of your team of monsters around will be steel/fight/fairy.- The most powerful held items such as Eviolite, Choice Spec/Band/Scarf and Life Orb are hidden throughout the game and can't be delivered from stores. Try to find every corner on routes and routes. You can just find one of these rare items! - Grab Digidex. If you don't, your monsters won't evolve.
