If yes then you came in the right place as in today's guide I will share with the complete installation instructions. It is highly recommended to read this article to the end otherwise you will fail. This single guide can be used for Fire Stick 2nd Generation, FireTV Stick Lite, FireTV Cube, or other Firestick 4K. If you have any of these devices you are good to go otherwise for those who have a separate device can go to any other site. Even if you don't know what this app can do or why you should download it, you can check out the below section. It's only for those who aren't familiar with it so if you already know it then you can simply skip this section and read another one. What is Aptoide TV? Aptoide TV is the alternative version of the Amazon App Store or Google Play Store that can be used on Firestick or other Android TV boxes. By using this Store a user can download any 3rd party app of their choice and even update them within seconds. It is the best option for those who use 3rd-party apps most of the time instead of using official apps. This app was once available for touch devices only but with the latest update it now officially supports FireTV devices and other Android TV boxes. In this version it fully supports remote control and also it supports voice search using Google Assistant, Alexa or even Siri.This is way better than the data transfer because it has its own database while the Downloader requires a link to download a particular app and also consumes much of our time. You can get it all and it's much better than the official Amazon Store has only a few apps and has too many limitations. With this Store, you can even download Geo-restricted apps and launch them right away. Other than this, you can also update any 3rd-party app just like in the official It has some famous apps like IPTV Smarter Pro, HBO Max, TVZion, TVZion, Cinema HD, TeaTV, Cyberflix, YouTube TV, Mobdro and almost every other streaming app. How to Install Aptoide TV On FireStickAfter knowing the value of having this app you certainly wanted to know how to install Apotide TV on your FireTV device. If that's true then you don't have to worry about it anymore as now we will discuss the complete installation instructions. However, Aptoide TV is not available on the Amazon Store which means we have to sideload it. In this case, we must first enable the Apps from Unknown Source option on our device. As with this option enabled, we can sideload 3rd-party apps otherwise you can't install it. To activate this feature, you just need to follow the given below steps:Note: For complete protection make sure to jailbreak Firestick completely and do not rely on this option only.1. Ok, so close the apps and then look above the menu bar and click Settings2. Now you have to move forward and then click myfire tv section.3. After this scroll down and click on Developer Options.4. At this time just select Apps from Unknown Source options and press select button.5. When you click on it a warning message will appear where just ignore it and click Turn on from there. Now the Apps from Unknown Source are turned on and we can now move on to the download section. But as I previously told you to stay safe you have to Jailbreak Firestick completely and if you don't know how to do it then follow this guide: Complete Guide to Jailbreak FireStick/FireTV 4KDownload and Install Aptoide TV Apk on FireTVAs we know that Aptoide TV is not available on the Amazon App Store which means we must first download an app for sideloading. So, in this section, we will use the famous and easy to use an app called Downloader.With the help of this app, you can download as many apps as you like without any limitations. Although it also has a built-in browser that can be used to surf the Internet. So, if you already have the downloader then you should miss a few steps as first we install the Downloader and then Aptoide Store.Ok, so below are the steps to install the downloader and install the Aptoide App Store on Firestick:First from go to the Start screen and then from the above menu click on Search or a Magnifying Glass icon. Now you will see the keyboard appears there so simply type downloader and you will see the suggestions below and options the first result from there. In the next screen, you will see the results related to your search term so now simply click on the first app that has an orange background. After this, you simply need to click the Download button (you own it), you now have to wait a while and when the app is downloaded just click Open to launch it. When you launch it for the first time this will require some permission and once option pops just click allow button. In the next next a dialog box will appear with some quick guide on how to use downloader, you can simply dismiss it by clicking the Got it button. Here a simple user interface of the downloader can be displayed with a simple box, just hover to that box and press select to start the keyboard. Now use the virtual keyboard just typing the link of an app that is and after that click the Go button or press the Play/Pause button from the remote control. At this time this will start connecting to the server and once it is done the app will start downloading and you can see the progress on the screen. Just be patient and wait a while until the app downloads and then it automatically start the install window there. When that window appears just click the install button and then again wait for a while. Now within seconds, Aptoide will be installed on your device and when you see App Installed just click Done.At this time it takes you back to the downloader window and you see it has the dialog box with three options. From this dialog box, you just need to click the Delete button. After this, it asks for the confirmation if you really want to delete it then again select the Delete button. The APK file has been removed from the device without the original app still installed. You always need to delete the backup file after installation which in this way allows you to save some storage space on your device. Saving storage can also be helpful in avoiding it from overheating, slow performance, lag, glitch and so on. If you can't find the icon for this app then simply go to your apps & channels and then click See All. At this time just scroll down and you will see the Aptoide icon in the app list. To open this app quickly, you can simply move it to the front screen of your device. For this just select the icon for this app and then click the menu button on the remote control. A menu will appear on the right side of the TV and then from here, click Move to Front. The icon will disappear from there and it will appear at the top. Now go back to start and you will see this app is listed on the first page now just soar to and press select to launch it.
