Biological anthropology the natural history of humankind (4th edition) pdf

Craig Stanford is a professor of anthropology and biological sciences at the University of Southern California, where he is also co-director of the Jane Goodall Research Center. He conducted field studies of primate behavior in south Asia, Latin America and East Africa. He is well known for his long-term research on eating meat among wild chimpanzees in Gombe, Tanzania, and the relationship between mountain gorillas and chimpanzees in Uganda's impenetrable forest. He is the author or co-author of more than 130 scientific publications. Craig received USC's highest award for introductory biological anthropology. He has also published fifteen books on primates, animal behavior and human origins, including *Beautiful Minds* (2008) and *Planet Without Monkeys* (2012). He and his wife, Erin Moore, a cultural anthropologist at USC, live in South Pasadena, California, and have three children. John Allen is a research fellow at the Dornsife Center for Cognitive Neuroscience and the Institute of Brain and Creativity at the University of Southern California. He is also a research fellow in the Department of Anthropology at Indiana University. He was previously a neuroscience researcher at the University of Iowa College of Medicine and a lecturer in the Department of Anthropology at the University of Auckland, N.Y., for several years. His main research interests are the evolution of the human brain and behavior, as well as behavioral diseases. He also has experience in molecular genetics, nutritional anthropology and the history of anthropology. He has conducted fieldwork in Japan, New York, Papua New Guinea and Palau. He received university awards for teaching introductory courses in biological anthropology as a graduate student lecturer at the University of California and as a lecturer at the University of Oakland. In addition to biological anthropology, he is also the author of *Medical Anthropology: A Biocultural Approach* (with Andrea S. Wylie; second edition, 2013), *Life of the Brain: The Evolution of Man and the Body of Mind* (2009), *Omnivorous Mind: Our Evolving Relationship with Food* (2012), and *Home: How Habitat Made Us Human* (2015). John and his wife Stephanie Sheffield have two sons, Reed and Perry. Susan Anton is a professor at the Center for the Study of Human Origin, Department of Anthropology at New York University, where she also directs the M.A. program in human skeletal biology. Her field studies are related to the evolution of the Homo genus in Indonesia and human impact on island ecosystems in the South Pacific. She is best known for her research on *H. erectus* in Kenya and Indonesia, for which she was elected as a fellow of the American Association for the Advancement of Science (AAAS). She is president of the American Association of Physical Anthropologists and editor of the journal *Human Evolution*. She received awards for teaching as a graduate instructor in introductory physical anthropology and anatomy at the University of California, was teacher of the year while at the University of Florida, and received the Golden Dozen Teaching Award and Medal for Outstanding Teaching from NYU. She was twice elected to *Who's Who* among America's Teachers. Susan and her husband, Carl Suister, a geochronologist, ran out of Anatolian shepherds.
