

SENIOR Mobile App developer (Ionic)

SOLARIS OFFGRID

Full time in Valencia, SPAIN

What's the job?

We are looking for a mobile app developer to join our team in providing solar energy for rural homes of sub-Saharan Africa. We make management software that allowed us to give electricity to more than 10,000 people in Tanzania, adding hundreds more every month. The software is a kind of specialized ERP that gives super-powers to agents on the ground and automates a lot of the necessary tasks to allow clients to get electricity on a "pay as you go" basis, meaning that they pay small installments that they can afford.

We are looking for:

Smart people
... who are mobile app developers with more than 5 years experience
... who follow good practices and agile principles
... who are independent
... and work well with others

You should have some practical software architecture and Ionic/Angular experience. It's also better if you know some Python and have experience in Agile, TDD and Java. Bonus points if you can do UI/UX.

If you're missing some of that and think you still have the chops, we say go for it.

What's the deal?

You'll need to be willing to move to Valencia, Spain as soon as possible. Our office is 5 min from the beach, which we think is pretty cool. We offer a competitive salary based on your experience and skills.

Apply!

Send us a quick email (jointhetechteam@solarisoffgrid.com) with your resume and tell us why you're excited to join us.
