

# CellSine

Electrical Cell Culture Monitoring

**Versatile**

## Study the phenomenon you want

CellSine technology can perform measurements on a variety of phenomena.

**Modular**

## Adapt it to your needs

The CellSine devices are modular and can be configured to accommodate up to 8 docking stations.

**Label Free**

## Study your system without affecting it

Since CellSine technology only uses weak electrical signals to gather information, the studied biological system remains unaffected.

**Real Time**

## Follow the events as they happen

CellSine technology allows you to track your experiment in real time.

**Easy visualization**

## Display data the way you want it

To extract the information you need, all CellSine devices come with easy-to-use graphing tools.
