Hacker mod for minecraft pe

1 Author: Bernard Date: 7-09-2020, 05:06 No time limit, use any cheats you would like to activate and it all works on version 1.16.40 Minecraft PE. The main edition of the application offers only a limited premium, but if you urgently need a simbot or any other option not available in the basic version, then install this mod. Toolbox is considered one of the best and most convenient hack apps banned in multiplayer! Any of the cheating options presented are banned on servers, please keep this in mind before you join the multiplayer game. But those who use hacks for a long time while playing Minecraft are aware of the possible consequences of being banned. The premium isn't much different from the free version of Toolbox, although there are some pretty serious options that you can't activate without a premium. For example, car bridges or robberies, goal settings and more, as well as advertising and so on. For the Minecraft Bedrock Edition, there are two options for winning a prize in Toolbox. The first is the simplest: just open the premium tab and turn it on. The downside is that it is time-limited and after a while you will return to the base version. The second method is version 5.4.9 (penultimate) with the mod included inside. This modification allows you to activate the premium and enjoy all the benefits, including cheats.
