I've got an AMD Phenom II X4 955 (4 core, 8threads, 2 GHz) please see my launchpad account who wants to help me? 3.6 Ghz Ram :) ... contrack: I'm sure they'll be wanting to help you =) contrack: And what do you need help with? :D I am having trouble adding to a user group in the gui bhavesh: I am having trouble adding to a user group in the gui Ahh, cuz I have no idea what you're talking about? XD hee hee thats cool join #ubuntu-ops . Did you read the link? no You need to boot into Ubuntu. Then you go to System > Administration > User Accounts I am on xubuntu I don't have a user accounts Aha let me search for the command useradd -g group /bin/bash /bin/bash contrack: Do you have a username and password? Yup hehe I figured it out this will add you to group ubuntu@ubuntu:~\$ sudo adduser username groupname sudo: adduser: command not found use usermod XDDDD bhavesh: use adduser Then what should I do with usermod? useradd 520fdb1ae7
