

# IT Infrastructure Architecture Services

MTS counsels and advises on Fractional Infrastructure and IT Architecture for Executive Leadership to make critical business decisions.

MTS Infrastructure Architect will assist in:

- Strategy for cloud and infrastructure
- Roadmap planning for projects
- Solution architecture for projects
- Engineering and deployment services
- Problem solving and mitigation strategies
- Comprehensive proactive Health Checks
- Consultative Upgrades
- IT Steering & C-level Meetings

## Roadmap & Strategy Value

### Options for Cloud Support:

- Time/Materials
- Fixed Pool of hours
- System Healthcheck & Upgrade Consultation

*We specialize in simplifying the Infrastructure for your organization and ensuring your strategy and technology meet your needs - nothing less or more!*

### Expertise for vision and problem solving?

Small and medium-sized businesses budgets do not allow for a full time Infrastructure Architect.

However, these businesses often need “some” of this expertise as they encounter challenges or make strategic technology decisions.
